discussion questions for west with giraffes: *Handbook of Latin American Environmental Aesthetics* Jens Andermann, Gabriel Giorgi, Victoria Saramago, 2023-09-05 The Handbook of Latin American Environmental Aesthetics offers a comprehensive overview of Latin American aesthetic and conceptual production addressing the more-than-human environment at the intersection between art, activism, and critique. Fields include literature, performance, film, and other audiovisual media as well as their interactions with community activisms. Scholars who have helped establish environmental approaches in the field as well as emergent critical voices revisit key concepts such as ecocriticism, (post-)extractivism, and multinaturalism, while opening new avenues of dialogue with areas including critical race theory and ethnicity, energy humanities, queer-*trans studies, and infrastructure studies, among others. This volume both traces these genealogies and maps out key positions in this increasingly central field of Latin Americanism, at the same time as they relate it to the environmental humanities at large. By showing how artistic and literary productions illuminate critical zones of environmental thought, articulating urgent social and material issues with cultural archives, historical approaches and conceptual interventions, this volume offers cutting-edge critical tools for approaching literature and the arts from new angles that call into question the nature/culture boundary.

The ability of youth to freely enjoy public spaces, and to develop a sense of belonging and attachment to these environments, is critical for their physical, social, cognitive, and emotional development. Young people represent a vital citizen group with legitimate rights to occupy and shape their public environments, yet they are often driven out of public places by adult users, restrictive bylaws, or hostile designs. It is also important that children and youth have the opportunity to genuinely participate in the planning of public spaces, and to have their needs considered in the design of the public realm. This book provides both evidence and tools to help effectively advocate for more youth-inclusive public environments, as well as integrate youth directly

into both research and design processes related to the public realm. It is essential reading for researchers, design and planning professionals, community leaders, and youth advocates.
