illustrated dental embryology histology and anatomy 3e: Teeth: A Very Short Introduction Peter S. Ungar, 2014-03-27 Teeth are amazing - the product of half a billion years of evolution. They provide fuel for the body by breaking apart other living things; and they must do it again and again over a lifetime without themselves being broken in the process. This means that plants and animals have developed tough or hard tissues for protection, and teeth have evolved ways to sharpen or strengthen themselves to overcome those defences. And just as different jobs require different tools, animals with different diets have different shaped teeth to deal with the variety of foods that they eat. In this Very Short Introduction, Peter S. Ungar, an award-winning author and leading scientist, presents the story of teeth. Ungar outlines the key concepts, including insights into the origin of teeth and their evolution. Considering why teeth are important, he describes how they are made, and how they work, including their fundamental importance in the fossil record. Ungar finishes with a review of mammal teeth, looking at how they evolved and how recent changes to our diet are now affecting dental health. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Illustrated dental embryology histology and anatomy 3e: Student Workbook for Illustrated Dental Embryology, Histology and Anatomy - E-Book Mary Bath-Balogh, Margaret J. Fehrenbach, 2014-04-25 Master the content from your textbook with this helpful study tool! Corresponding to the chapters in Illustrated Dental Embryology, Histology, and Anatomy, 3rd Edition, this workbook helps you understand and apply material with case studies, labeling exercises, helpful guidelines, and more. It includes 32 removable flashcards for quick, convenient review and study, and prepares you for the National Board Dental Hygiene Examination (NBDHE) with its case-based focus. A logical organization allows you to focus on those areas in which you need more practice, with units on: (1) labeling, (2) terminology, (3) tooth structure, and (4) case-based application. Detailed case studies include radiographs, clinical photos, profiles, complaints, health histories, intraoral examination data, and multiple-choice questions, promoting critical thinking and providing preparation for board examinations. Labeling exercises provide unlabeled images from the textbook to allow you to identify the different structures. 32 detachable flashcards help you master tooth morphology and tooth numbering. Clear line drawings of the permanent anterior and posterior teeth include the five views of the tooth (labial, lingual, mesial, distal, and incisal) on the front and a tooth description on the back. Guidelines for Tooth Drawing include detailed instructions, tips, and dimensions for drawing each permanent tooth. Infection Control for Extracted Teeth presents guidelines in an easy-to-follow numbered list, providing the proper procedures for the collection and inspection of extracted teeth. Occlusal Evaluation shows how to perform an occlusal evaluation using the necessary equipment and steps. Glossary exercises include crossword puzzles and word searches for practice and review of key terminology. Three-hole-punched and perforated pages are easy to fit into a binder, and pages can be removed and turned into instructors for assignments or extra credit. New case studies are added, and clinical and radiographic photographs and questions are expanded on existing cases, helping you prepare for the case-based focus of the NBDHE. Expanded labeling (structure identification) exercises include additional developmental, microbiological, and anatomical structures for more practice in correctly identifying various parts or structures.
