jurassic park book free: *Hollywood Online* Ian London, 2024-03-07 Hollywood Online provides a historical account of motion picture websites from 1993 to 2008 and their marketing function as industrial advertisements for video and other media in the digital age. The Blair Witch Project is the most important example of online film promotion in cinema history. Over the last thirty years only a small number of major and independent distributors have converted internet-created buzz into box-office revenues with similar levels of success. Yet readings of how the film's internet campaign broke new ground in the summer of 1999 tend to minimize, overlook or ignore the significance of other online film promotions. Similarly, claims that Blair initiated a cycle of imitators have been repeated in film publications and academic studies for more than two decades. This book challenges three major narratives in studies about online film marketing: Hollywood's major studios and independents had no significant relationship to the internet in the 1990s; online film promotions only took off after 1999 because of Blair; and Hollywood cashed-in by initiating a cycle of imitators and scaling up corporate activities online. Hollywood Online tests these assumptions by exploring internet marketing up to and including the film's success online (Pre-Blair, 1993-9), then by examining the period immediately after Blair (Post-Blair, 2000-8) which broadly coincides with the rise and decline of DVD, as well as the emergence of the social media sites MySpace, Facebook and Twitter.

jurassic park book free: *Fear in Front of the Screen* Maya Götz, Dafna Lemish, Andrea Holler, 2019-01-17 Experiencing fear in front of the screen is a common phenomenon in childhood, and a focus of public concern. Yet, research has encountered ethical and methodological challenges and has focused largely on the effects of watching disturbing news. In this innovative book, this universal experience is investigated in depth via two complementary studies: 1) a retrospective study of experiences related by 626 undergraduate students from eight countries; and 2) a study of the current nightmares induced by watching television of 510 children in five countries. The results presented in this book highlight the most common elements of fear in front of the screen more generally, followed by a focused analysis of the unique features of fear that characterize different developmental stages: pre-school, middle childhood, pre-teens and teenagers. The rich descriptions distinguish between the negative experiences of fear versus the positive experiences of thrill, and explores gender and cultural differences. Finally, the book offers implications for media producers and policy makers as well as for parents and educators.
