expository writing course online: English Studies Online Willam P. Banks, Susan Spangler, 2021-06-19 English Studies Online: Programs, Practices, Possibilities represents a collection of essays by established teacher-scholars across English Studies who offer critical commentary on how they have worked to create and sustain high-impact online programs (majors, minors, certificates) and courses in the field. Ultimately, these chapters explore the programs and classroom practices that can help faculty across English Studies to think carefully and critically about the changes that online education affords us, the rich possibilities such courses and programs bring, and some potential problems they can introduce into our department and college ecologies. By highlighting both innovative pedagogies and hybrid methods, the authors in our collection demonstrate how we might engage these changes more productively. Divided into three interrelated conversations — practices, programs, and possibilities — the essays in this collection demonstrate some of the innovative pedagogical work going on in English departments around the United States in order to highlight how both hybrid and fully online programs in English Studies can help us to more meaningfully and purposefully enact the values of a liberal arts education. This collection serves as both a cautionary history of teaching practices and programs that have developed in English Studies and a space to support faculty and administrators in making the case for why and how humanities disciplines can be important contributors to digital teaching and learning. expository writing course online: *Discussion-Based Online Teaching To Enhance Student Learning* Tisha Bender, 2023-07-03 The new edition of what is now considered a classic on online learning has been expanded by about a third to reflect new opportunities offered by social media, new insights and ideas derived from the author's teaching in the eight years since she wrote the first edition, as well as from extensive research in the latest literature. In particular, Tisha Bender investigates whether the existing paradigm of teaching and learning has been changed, not so much because of the advent of the Internet, but because of the potential divide between the expectations and practices of students who are "digital natives" of the digital revolution, and those of their teachers who are mostly "digital immigrants". She addresses the question: do we need to change the way we teach in order to reach and engage digital natives fruitfully and enjoyably in their education. This accessible and comprehensive book offers an engaging and practical approach to online teaching that is rooted in the author's experience and enthusiasm for creating a virtual environment that engages students and fosters their deep learning. This is a book for all educators and administrators in higher education, in any discipline, engaged in, or contemplating offering, online classes that involve discussion or collaborative learning. It is relevant both to faculty teaching a hybrid and face-to-face classes, and courses conducted entirely online.

expository writing course online: Adult Learning for Self and Relational Growth (ALG) Isabel

Borrás, 2016-03-22 This book describes an adult non-formal learning model, Adult Learning for Self and Relational Growth (ALG), aimed at promoting adults' development in autonomy and interdependence, from early adulthood to old age. Grounded on tenets from cognitive psychology, philosophy, sociology, and adult education, the model assumes that human development is propelled by two psychological needs, personal betterment and social belonging, and that the materialization of such development requires on the one hand, the exercise of human thought abilities like reflectivity, generativity, and creativity, and on the other, a milieu enabling such exercise. To address those requirements, the model proposes a conviviality-oriented instructional approach with three learning venues (Explorations, Enrichments, and Creations) featuring a variety of illustrative courses and projects. The approach offers adults opportunities to access and share information and knowledge leading to critical reflection on their beliefs and value systems, as well as opportunities to use their creativity and generativity to express their ideas and feelings, and to act for the common good. Attainment of the instructional approach's objectives, both age-related and general (Cultivate, Cope and Care), could help adults achieve a decentralized personalist perspective on development. A perspective that, based on personal valuation and justification of individual growth with and by the growth of others, could result in adults' greater self-determination, humanness, and capacity for social change. The book also describes and justifies the makeup of the model's target population and the learning centers suitable for its implementation.

expository writing course online: Organic Writing Assessment Bob Broad, Linda Adler-Kassner, Barry Alford, Jane Detweiler, Heidi Estrem, Susanmarie Harrington, Maureen McBride, Eric Stalions, Scott Weeden, 2009-09-01 Educators strive to create “assessment cultures” in which they integrate evaluation into teaching and learning and match assessment methods with best instructional practice. But how do teachers and administrators discover and negotiate the values that underlie their evaluations? Bob Broad’s 2003 volume, *What We Really Value*, introduced dynamic criteria mapping (DCM) as a method for eliciting locally-informed, context-sensitive criteria for writing assessments. The impact of DCM on assessment practice is beginning to emerge as more and more writing departments and programs adopt, adapt, or experiment with DCM approaches. For the authors of *Organic Writing Assessment*, the DCM experience provided not only an authentic assessment of their own programs, but a nuanced language through which they can converse in the always vexing, potentially divisive realm of assessment theory and practice. Of equal interest are the adaptations these writers invented for Broad’s original process, to make DCM even more responsive to local needs and exigencies. *Organic Writing Assessment* represents an important step in the evolution of writing assessment in higher education. This volume documents the second generation of an assessment model that is regarded as scrupulously consistent with current theory; it shows DCM’s flexibility, and presents an informed discussion of its limits and its potentials.

expository writing course online: *Writing for Wellbeing* Katrin Den Elzen, Reinekke Lengelle, 2023-07-07 Writing can support our wellbeing even under the most difficult life circumstances, helping us to adapt to significant change, make sense of loss, improve our physical and emotional resilience, and foster personal growth. Numerous studies of Expressive Writing have confirmed this, and there are other established methodologies for practice. However, to date, few accounts have offered detailed descriptions showing how and why putting pen to paper can be so beneficial. This book delves deeply into the landscape of Writing-for-wellbeing and demonstrates the transformative power of writing in a wide range of contexts. Topics include personal trauma narratives within the Humanities; a participatory Writing-for-wellbeing study that demonstrates the effectiveness of writing in the context of grief and loss; surprise as the hidden mainspring of poetry’s therapeutic potency; the empowerment and healing potential offered by Black women’s blogs; playwriting positioning LGBTQIA+ identities as positive through stories of belonging; how writing workshops have helped newly literate Indigenous adults and other participants in the Australian outback; and how the smuggled writings of Behrouz Boochani have enabled global witnessing of the stories of refugees held in offshore detention. This resource sets out the theory and research at the foundation of Writing-for-wellbeing in close relation to full and engaging accounts of practice. It aims to make the topic accessible and affirms its place as an effective reconstructive practice alongside other expressive arts therapies, providing a holistic and inspiring resource for anyone wishing to practice, teach, or research Writing-for-wellbeing.

expository writing course online: The Well-Trained Mind Susan Wise Bauer, Jessie Wise, 2016-08-09 Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. The Well-Trained Mind will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in The Well-Trained Mind to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. The Well-Trained Mind will give you the tools you'll need to teach your child with confidence and success.
