Content and Structure

The book is organized into thematic chapters that cover fundamental areas of human geography. Topics range from population studies and migration patterns to political geography and economic systems. Each chapter integrates real-world examples that connect abstract concepts to tangible human experiences. This approach enhances comprehension, especially for students new to the discipline.

One of the distinguishing features of this edition is its emphasis on “place” and “culture” as dynamic, interconnected elements. The authors argue that understanding geography requires more than mapping locations; it involves grasping the social processes and cultural identities that define those places. This conceptual framework is woven consistently throughout the text, providing a cohesive narrative that underscores the complexity of human-environment interactions.

human geography people place and culture 11th edition: *Humanistic Tourism* Maria Della Lucia, Ernestina Giudici, 2020-12-29 Human dignity has experienced limited attention in tourism studies. The interlinked dimensions of dignity in tourism urgently ask for broad avenues of future research, as tourism is both an information-intensive industry and an experience good resulting from the relationship and co-creation processes involving hosts and guests in different political, socio-economic, cultural, and environmental contexts. These contexts play a role in how an individual's values, norms, and experiences may be experienced in tourism. This edited book is one of the first attempts to apply to tourism a humanistic management approach entailing a re-discovery of the value of human life, dignity, and awareness of the ethical dimensions of work. The book develops awareness of the contemporary relevance of the human dignity concept to interpret and manage the weaknesses of traditional approaches to tourism and cope with the challenges and new scenarios, including the current COVID-19 pandemic crisis. It presents ethical values and norms as both foundations and vehicles to dignify tourism stakeholders' vision and mission (policy, strategies, and practices) as well as people/tourist beliefs, attitudes, and behaviors. It grounds humanistic education as a pervasive mechanism to innovate tourism management contents and practices by offering to different targets new educational and training formats or framing differently traditional ones. Presenting both a critical and a positive approach to tourism management, the diversity of disciplinary approaches, case studies, and examples makes the book attractive to a variety of readers including tourism scholars, researchers, practitioners, and postgraduate students of management and organization disciplines.
