oae special education 43 study guide: Issues in Educational Placement James M. Kauffman, Daniel P. Hallahan, Terry A. Astuto, John Wills Lloyd, 2019-08-07 Placement of students with disabilities in the least restrictive environment has become a central issue in special education. To date, no comprehensive treatment of placement issues is available, especially for students with emotional and behavioral disorders who present particularly difficult placement problems. This book combines data and discussions intended to further the understanding of how and why decisions are made to place students with emotional or behavioral disorders in particular educational environments. This volume establishes the problem of placement in a contemporary and historical context, reviews the literature on placement of students with emotional or behavioral disorders, and discusses placement options and concerns about multicultural issues, post-secondary education, law and regulation, demands on teachers, and policy choices. Its goals are to: * improve understanding of decision processes leading to placement, * set the stage for improvements in pupils' lives in school and elsewhere, and * stimulate research on the many placement issues that are left unresolved.

oae special education 43 study guide: Teachers' Preparation for the Implementation of Inclusive Education in Primary Schools in Eswatini S'lungile K. Thwala, Tsediso Michael Makoelle, 2022-03-04 This book is about inclusive education, and is designed to prepare teachers to effectively teach exceptional children in primary schools in Southern Africa. It identifies key concepts associated with inclusive education, and discusses these in relation to issues in the reform of teacher education. It argues that the reform of teacher education for inclusive education is an important activity in improving educational equity. The theoretical framework for inclusion is outlined and examples of how teachers might engage in more inclusive practice are presented, as are the benefits of inclusive education. The book argues that preparation for inclusive education requires a new framework that calls for partnership between universities and schools. It is envisaged that the book will fill a gap in literature and practice, thereby enabling policy makers, college administrators and lecturers to review policies, teacher education curricula and pedagogical issues pertaining to preparing teachers for working in inclusive schools. As such, it will provide a springboard for teachers' colleges and universities to improve teacher preparation for inclusive education.

oe special education 43 study guide: *A Handbook on Stuttering, Seventh Edition* Oliver Bloodstein, Nan Bernstein Ratner, Shelley B. oe special education 43 study guide: *Handbook of Response to Intervention and Multi-Tiered Systems of Support* Paige C. Pullen, Michael J. Kennedy, 2018-10-16 Of the many issues facing special education (and general education) today, it is difficult to imagine one more important or timely than response to intervention (RTI). Almost overnight RTI has become standard practice across the nation. Unfortunately, RTI remains ill-defined, falls far short of its evidence-based practice goal, is almost invariably misused, and often results in more harm than good. Nevertheless, as a conceptual framework RTI has great potential for ensuring that students with disabilities receive appropriate, evidence-based instruction. The mission of this handbook is to present a comprehensive and integrated discussion of response to intervention (RTI) and its relation to multi-tiered systems of support (MTSS) in both special education and general education. Although the two terms are currently used interchangeably, distinct differences exist between them. Therefore, chapters are dedicated to distinguishing the two concepts—RTI and MTSS—and describing each one's unique role in both general and special education. In addition, the authors recommend a third term, Multi-Tiered Instruction, to differentiate the practices related to the purpose of the specific intervention.
