How have we developed new religious

and cultural patterns? How have the paths of 'The West' and 'The Rest' diverged over the last five centuries? How, at the same time, has the world become more interconnected and globalized? How is this world characterized by growing gaps in wealth, poverty and inequality? world history textbook mcgraw hill: The New World History Ross E. Dunn, Laura J. Mitchell, Kerry Ward, 2016-08-23 The New World History is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field. The forty-four articles in this book take stock of the history, evolving literature, and current trajectories of new world history. world history textbook mcgraw hill: The Oxford World History of Empire Peter Fibiger Bang, Christopher Alan Bayly, Walter Scheidel, 2021 This is the first world history of empire, reaching from the third millennium BCE to the present. By combining synthetic surveys, thematic comparative essays, and numerous chapters on specific empires, its two volumes provide unparalleled coverage of imperialism throughout history and across continents, from Asia to Europe and from Africa to the Americas. Only a few decades ago empire was believed to be a thing of the past; now it is clear that it has been and remains one of the most enduring forms of political organization and power. We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods, such as the relatively short age of European colonialism. The history of empire, as these volumes amply demonstrate, needs to be drawn on the much broader canvas of global history. Volume Two: The History of Empires tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present. Case studies deal with the full range of the historical experience of empire, from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay, and from ancient Rome and China to the Mughals, American settler colonialism, and the Soviet Union. Forty-five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases.

world history textbook mcgraw hill: The First U.S. History Textbooks Barry Joyce, 2015-08-27 This book analyzes the common narrative residing in American History textbooks published in the first half of the 19th century. That story, what the author identifies as the American "creation" or "origins" narrative, is simultaneously examined as both historic and "mythic" in composition. It offers a fresh, multidisciplinary perspective on an enduring aspect of these works. The book begins with a provocative thesis that proposes the importance of the relationship between myth and history

in the creation of America's textbook narrative. It ends with a passionate call for a truly inclusive story of who Americans are and what Americans aspire to become. The book is organized into three related sections. The first section provides the context for the emergence of American History textbooks. It analyzes the structure and utility of these school histories within the context of antebellum American society and educational practices. The second section is the heart of the book. It recounts and scrutinizes the textbook narrative as it tells the story of America's emergence from "prehistory" through the American Revolution—the origins story of America. This section identifies the recurring themes and images that together constitute what early educators conceived as a unified cultural narrative. Section three examines the sectional bifurcation and eventual re-unification of the American History textbook narrative from the 1850s into the early 20th century. The book concludes by revisiting the relationship between textbooks, the American story, and mythic narratives in light of current debates and controversies over textbooks, American history curriculum and a common American narrative.

world history textbook mcgraw hill: Nationalism and History Education Rachel Hutchins, 2016-02-26 History education, by nature, transmits an 'official' version of national identity. National identity is not a fixed entity, and controversy over history teaching is an essential part of the process of redefining and regenerating the nation. France and the United States have in particular experienced demographic and cultural shifts since the 1960s that have resulted in intense debates over national identity. This volume examines how each country's national history is represented in primary schools' social studies textbooks and curricula, and how they handle contemporary issues of ethnicity, diversity, gender, socio-economic inequality, and patriotism. By analyzing each country separately and comparatively, it demonstrates how various groups (including academics, politicians and citizen activists) have influenced education, and how the process of writing and rewriting history perpetuates a nation. Drawing on empirical studies of the United States and France, this volume provides insight into broader nationalist processes and instructive principles for similar countries in the modern world.

world history textbook mcgraw hill: Interpreting Islam Hastings Donnan, 2002-02-15 Islam is one of the most misunderstood concepts in the West. Myths and stereotypes surround it. This clear and penetrating volume helps readers to make sense of Islam. It offers a penetrating guide to the diversity and richness of contemporary knowledge about Islam and Muslim society. Throughout, the emphasis is upon the value of pluralistic approaches to Islam, rather than condensing complexity with unifying concepts such as 'Orientalism'. Interdisciplinary in scope and organization, the book cuts through the bewildering and seemingly anarchic diversity of contemporary knowledge about Islam and Muslim society. The methodological difficulties and advantages of Western researchers focusing on Islam are fully documented. The book demonstrates how gender, age, status and 'insider' / 'outsider' status impacts upon research and inflects research findings.

world history textbook mcgraw hill: Muslims and Islam in U.S. Education Liz Jackson, 2014-04-03 Winner of Philosophy of Education Society of Australasia (PESA)'s inaugural PESA Book Awards in 2015, and The University of Hong Kong Research Output Prize for Education 2014-15. *Muslims and Islam in U.S. Education* explores the complex interface that exists between U.S. school curriculum, teaching practice about religion in public schools, societal and teacher attitudes toward Islam and Muslims, and multiculturalism as a framework for meeting the needs of minority group students. It presents multiculturalism as a concept that needs to be rethought and reformulated in the interest of creating a more democratic, inclusive, and informed society. Islam is an under-considered religion in American education, due in part to the fact that Muslims represent a very small minority of the population today (less than 1%). However, this group faces a crucial challenge of representation in United States society as a whole, as well as in its schools. Muslims in the United States are impacted by ignorance that news and opinion polls have demonstrated is widespread among the public in the last few decades. U.S. citizens who do not have a balanced, fair and accurate view of Islam can make a variety of decisions in the voting booth, in job hiring, and within their small-scale but important personal networks and spheres of influence, that make a very negative impact on Muslims in the United States. This book presents new information that has implications for curricula, religious education, and multicultural education today, examining the unique case of Islam in U.S. education over the last 20 years. Chapters include: Perspectives on Multicultural Education 9/11, the Media, and the New Need to Know Islam and Muslims in Public Schools Blazing a Path for Intercultural Education This book is an essential resource for professors, researchers, and teachers of social studies, particularly those involved with multicultural issues, critical and sociocultural analysis of education and schools; as well as interdisciplinary scholars and students in anthropology and education.

Analysen in Geschichts-, Ethik und Religionsschulbüchern unterschiedlicher Länder ergeben hinsichtlich der Konstruktion religiöser Vielfalt ein disparates Bild. Deutlich wird allerdings, dass alle Schulfächer im Hinblick auf religiöse und weltanschauliche Vielfalt vor ähnlichen Herausforderungen stehen. Eine Reihe von Beiträgen zeigt, dass Religionen in Bildungsmedien bisher nicht in ihren Wandlungen in den Blick genommen werden und die Grenzziehung zwischen Religion und »Nicht-Religion« unterbestimmt bleibt. Klar wird auch, dass die Debatte um den angemessenen Bildungszugang zu Religion in demokratischen Gesellschaften wieder an Dynamik gewonnen hat.
