As one of the Big Four accounting firms, KPMG's annual financial disclosures offer valuable insights into its operational resilience, revenue streams, and strategic priorities. This article delves into the key components of KPMG's 2022 financial statements, exploring revenue growth trends, expense management, geographical performance, and broader implications for the auditing and consulting industry.

Overview of KPMG's 2022 Financial Performance

KPMG's financial statements for 2022 highlight the firm's ability to sustain growth amid a volatile macroeconomic environment. The global professional services market faced persistent headwinds including inflationary pressures, geopolitical uncertainties, and rapid technological disruptions. Despite these challenges, KPMG reported a noteworthy increase in global revenues, signaling robust demand for audit, tax, and advisory services.

According to the published financial data, KPMG's consolidated revenues rose by approximately 7% compared to 2021, reaching a record high. This growth was fuelled by a strategic emphasis on digital transformation services and expanded advisory engagements, which helped offset slower growth in traditional audit revenues. The firm's financial statements underscore a diversified revenue base, with advisory services accounting for an increasing share of total income.

Revenue Breakdown and Service Line Analysis

The 2022 statements categorize revenues across three primary service lines: Audit, Tax,

and Advisory. Audit services, traditionally the cornerstone of KPMG's business, contributed around 45% of total revenues. While audit fees grew modestly, the segment faced margin pressures due to increased regulatory scrutiny and investments in audit quality enhancement technologies.

Tax advisory services maintained steady growth, reflecting ongoing demand for corporate tax planning amid changing international tax regimes. This segment accounted for roughly 25% of revenues, supported by KPMG's expanded capabilities in digital tax solutions and compliance automation.

The advisory segment demonstrated the strongest growth trajectory, increasing by nearly 12% year-over-year. KPMG's financial statements reveal that this surge was driven by consulting projects in areas such as risk management, cybersecurity, and cloud transformation. Advisory services now represent approximately 30% of total revenues, underscoring their rising strategic importance.

Expense Management and Profitability Insights

KPMG's 2022 financial statements also provide a window into the firm's cost structure and profitability metrics. Operating expenses increased in line with revenue growth, driven by higher personnel costs, technology investments, and expansion into new markets.

Personnel Costs and Talent Investments

As a people-centric firm, KPMG's largest expense category remains employee compensation. The 2022 financial disclosures show a 9% rise in personnel expenses, reflecting strategic hiring to meet growing client demand and enhanced remuneration to retain top talent. Investments in upskilling and diversity initiatives were also prominently noted, aligning with the firm's long-term commitment to workforce development.

Technology and Infrastructure Spending

Significant expenditure on technology infrastructure highlights KPMG's focus on digital innovation. The financial statements detail capital investments in advanced data analytics platforms, artificial intelligence tools for audit automation, and cloud-based collaboration systems. These technology costs, while increasing short-term expenses, are positioned as critical enablers for future efficiency gains and service differentiation.

Profit Margins and Earnings

Despite rising costs, KPMG managed to sustain healthy profit margins. The reported operating margin remained stable at around 20%, supported by disciplined expense controls and revenue mix optimization. Net earnings reflected a modest increase,

signaling effective cost management balanced against strategic investments.

Geographical Performance and Market Expansion

KPMG operates through a global network of member firms, and the 2022 financial statements provide granular data on performance across key regions.

North America

North America continued to be the largest revenue contributor, accounting for nearly 40% of the firm's global income. Growth in this region was largely driven by advisory services, particularly in technology consulting and risk advisory. The financial statements highlight a surge in demand from financial services clients navigating regulatory changes and digital transformation.

Europe

Europe remained a stronghold for KPMG, with revenues increasing moderately. The region faced some headwinds from economic uncertainties and inflation, but steady demand for audit and tax services helped stabilize growth. The firm's investments in sustainability consulting also started to yield returns, reflecting growing client focus on ESG compliance.

Asia Pacific

The Asia Pacific region emerged as a high-growth market in 2022, with revenue increases exceeding 10%. Expanding economies and digital adoption fueled demand for advisory and tax services. KPMG's financial statements emphasize strategic partnerships and localized service offerings as drivers of success in this diverse and dynamic region.

Comparative Perspective: KPMG vs. Other Big Four Firms

Analyzing KPMG's 2022 financial statements alongside competitors Deloitte, PwC, and EY reveals notable industry trends. While all Big Four firms reported growth, KPMG's 7% revenue increase was slightly below Deloitte's double-digit growth but on par with EY. KPMG's growing advisory segment aligns with a broader shift across the professional services landscape, where consulting increasingly supplements traditional audit revenue.

KPMG's investment in technology and talent appears consistent with industry best

practices, though the firm's operating margins are marginally lower than some peers, possibly reflecting its strategic emphasis on expanding service lines and geographic footprint.

Implications for Stakeholders and Industry Trends

The insights from KPMG financial statements 2022 have significant implications for various stakeholders including clients, investors, regulators, and employees. For clients, the firm's growing advisory capabilities suggest increased access to integrated consulting solutions that address complex business challenges. Investors and member firms benefit from the demonstrated financial resilience and capacity for innovation.

From a regulatory perspective, KPMG's sustained focus on audit quality and compliance investments reflects an adaptive approach to evolving oversight demands. Additionally, the firm's emphasis on ESG-related advisory services signals responsiveness to emerging client priorities around sustainability and corporate responsibility.

Challenges and Opportunities Ahead

While the 2022 financial results underscore positive momentum, challenges remain. Inflationary pressures and global economic uncertainty could impact client budgets and demand. Furthermore, intensifying competition and rapid technological change require ongoing agility and investment. However, KPMG's demonstrated commitment to digital transformation and talent development positions it well to capitalize on future opportunities.

- **Challenges:** Rising personnel and technology costs, regulatory scrutiny, competitive pressures
- **Opportunities:** Growth in advisory services, digital innovation, ESG consulting, emerging markets

The 2022 financial statements serve as a testament to KPMG's strategic adaptability amid a shifting professional services landscape, balancing prudent fiscal management with forward-looking investments.

kpmg financial statements 2022: Die große Consulting-Show Mariana Mazzucato, Rosie H. Collington, 2023-04-15 Es gab Zeiten, da haben Berater einfach Firmen beraten, heute steuern sie in vielen Ländern die Regierungsgeschäfte und beeinflussen die Gesetzgebung. Das Outsourcing von staatlichen Aufgaben hat exorbitant zugenommen, Unsummen an Steuergeldern fließen in die Consulting-Industrie. Ein undurchschaubares System von Verträgen ist entstanden und macht die Frage nach Verantwortlichkeiten kompliziert. Dies ist eine sehr gefährliche Entwicklung, sagt Starökonomin Mariana Mazzucato: Je mehr der Staat an Ressourcen und Wissen verliert, umso mehr verlernt er, seine eigenen Aufgaben zu erfüllen. kpmg financial statements 2022: Sustainable Development and Finance in Europe Małgorzata Janicka, Artur Sajnog, 2025-06-09 Sustainable development is a major challenge of our times. The conditions necessary for sustainable transformation cut across all economic entities and sectors that operate on macro- and micro-economic scales, both nationally and internationally. The subject of sustainability has been represented in the public space for years, but there are few studies available on the practical implementation of the related goals and most publications focus on the issues of "green" finance and the environment. A particularly large information gap relates to the role of sustainable finance in achieving sustainable development, which has been underestimated for years. This book characterizes and evaluates how stock markets operate in European Union (EU) countries in terms of the sustainable development of public companies. The book addresses two key research areas. Firstly, it provides an analysis of the legal and institutional environment of the EU stock markets in the sustainable reconstruction of the European economy and secondly, it assesses the conditions for EU public companies to implement environmental, social, and governance (ESG) non-financial reporting requirements, and how the ESG indicators, based on these, function. The book presents the methodology for constructing ESG indicators, with particular emphasis on Refinitiv, which is one of the largest databases in this area and the most recognizable on a global scale. The book is a valuable source of knowledge on the conditions and consequences of changes in the financial markets, especially the stock markets and is addressed primarily to the academic community but may also be informative, engaging, and useful for various stakeholders in the business sector, including enterprises, institutional and individual investors, and financial institutions.

kpmg financial statements 2022: The Big Con Mariana Mazzucato, Rosie Collington, 2025-05-20 A vital and timely investigation into the opaque and powerful consulting industry—and what to do about it There is an entrenched relationship between the consulting industry and the way business and government are managed today that must change. Mariana Mazzucato and Rosie Collington show that our economies' reliance on companies such as McKinsey & Company, Boston Consulting Group, Bain & Company, PwC, Deloitte, KPMG, and EY stunts innovation, obfuscates corporate and political accountability, and impedes our collective mission of halting climate breakdown. The "Big Con" describes the confidence trick the consulting industry performs in contracts with hollowed-out and risk-averse governments and shareholder value-maximizing firms. It grew from the 1980s and 1990s in the wake of reforms by the neoliberal right and Third Way progressives, and it thrives on the ills of modern capitalism, from financialization and privatization to the climate crisis. It is possible because of the unique power that big consultancies wield through extensive contracts and networks—as advisors, legitimators, and outsourcers—and the illusion that they are objective sources of expertise and capacity. In the end, the Big Con weakens our businesses, infantilizes our governments, and warps our economies. In *The Big Con*, Mazzucato and Collington throw back the curtain on the consulting industry. They dive deep into important case studies of consultants taking the reins with disastrous results, such as the debacle of the roll out of HealthCare.gov and the tragic failures of governments to respond adequately to the COVID-19 pandemic. The result is an important and exhilarating intellectual journey into the modern economy's beating heart. With peerless scholarship, and a wealth of original research, Mazzucato and Collington argue brilliantly for building a new system in which public and private sectors work innovatively for the common good.

kpmg financial statements 2022: Sustainability Disclosure Maria Aluchna, Grażyna Aniszewska-Banaś, Rafał Mrówka, Mikołaj Pindelski, Tomasz Serwański, Justyna Szumniak-Samolej, 2025-09-11 Sustainability Disclosure examines the evolution of sustainability disclosure resulting from the implementation of mandatory reporting legislation within the European Union using the evidence from the Non-Financial Reporting Directive (NFRD) and Corporate Sustainability Reporting Directive (CSRD). Overall, the findings underscore the significance of mandatory reporting legislation in increasing the number of companies disclosing their social and environmental impact, as well as broadening the scope of reporting. Addressing the current topics of mandatory regime for sustainability disclosure, the book offers important insights for academic scholars, regulators, and policy makers indicating strength and weaknesses of NFRD with potential feedback for the recently introduced CSRD regulation. In addition, the analysis of the evidence from companies listed on the Warsaw Stock Exchange (WSE) delivers interesting lessons for practitioners, managers, and auditors responsible for implementing mandatory reporting legislation at the company level. Finally, the book would be helpful for Ph.D. candidates and students of management and organisation, economics, finances as well as legal studies willing to develop their understanding about sustainability disclosure.

kpmg financial statements 2022: Make Better Strategic Decisions Jeremy N. White, 2023-12-15 Every day we hear of serious errors of judgement that result in organisational disaster.

Why do seemingly successful businesses, NGOs, or even political parties fall prey to irrevocable governance breakdowns or, worse still, criminal malpractice? By prompting readers to think deeply about strategic decision-making, human behaviour, and cognitive biases, this book offers a disciplined, objective, and thoughtful approach to making better decisions. Every strategic problem is fundamentally a journey into the unknown, which involves a unique combination of duration, scale, external and internal dynamics, and personal motivations. Rarely is a strategic decision solved by saying, 'If a situation is A, then the solution is B.' The book explores how to develop a strong foundation for problem resolving – rather than simplistic problem-solving – by strengthening competence so that decisions are made wisely. The case of Carillion plc, the second-largest construction group in the United Kingdom that went bankrupt in January 2018, is used to explore how a large and profitable company collapsed so dramatically when it was run by an experienced board and advised by three of the Big Four accounting firms. Professor Jeremy N. White presents a clear strategic toolkit for better strategic decision-making. This book will appeal to senior managers who are interested in techniques for making better strategic decisions. The lessons from the failure of Carillion plc are applicable to corporate leaders in addition to politicians and those who run not-for-profit organisations.

kpmg financial statements 2022: Taking on Climate Change Through Green Taxation Dinis, Ana Arromba, David, Fátima, Pereira, Liliana, Dias, Sara Luís, 2023-08-10 Since environmental issues entered the global agenda, governments have directing businesses towards sustainability. The term sustainability is commonly associated with a firm's environmental attentiveness, although there are two other areas in which companies should be sustainable: social, to achieve an adequate relationship and fluid communication with their stakeholders, and economic, to accomplish transparent management and correct distribution of the wealth that is generated. The growing demand for corporate transparency encourages the publication of sustainability or corporate social responsibility (CSR) reports, providing information of a non-financial nature concerning the social and environmental dimensions of business activity, namely relations with local communities, the protection of human rights, corporate governance, and adaptation to climate change. Being no exception, and following the European agenda for sustainability development, several governments have implemented tax measures that promote sustainable consumption and production patterns to reduce energy dependence on external sources and efficiently achieve international targets, among others, within a context of neutrality of the tax system. This is where environmental tax incentives come in, underlying a paradigm shift. The relationship between tax policy and environmental policy is seen by governments as an opportunity to adjust the tax system to a more energy-efficient economy in the use of resources. For instance, green tax incentives motivate investors to invest in green properties, encouraging them to opt for greener solutions. That is, tax incentives should be viewed as a tool to empower taxpayers to change actions that may reduce carbon emissions and contribute to sustainability. *Taking on Climate Change Through Green Taxation* provides applied research on increasing green tax literacy to build the capacity of companies to adopt sustainable practices in favor of environmental protection, to raise companies' awareness of sustainable

reporting, and to increase international discussion on the issue of environmental taxation and its impact on more sustainable business decisions. Led by business experts with over 20 years of experience, this book will cover topics such as corporate social responsibility, environmental tax management, and sustainable tax policy. This resource is ideal for policymakers, corporate governance and social responsibility professionals, and researchers interested in taxation, accounting, auditing, finance, corporate governance, and corporate social responsibility.

This book provides both the rationale for and key practical steps in how to approach business sustainability factors of planning, performance, risk, reporting, and assurance. This comprehensive book covers all the areas that a business would need to embed, articulate, and execute a strategy of profit-with-purpose in promoting shared value creation for all stakeholders. It addresses drivers, sources, and international guidelines (GRI, IIRC, SASB, FASB, PCAOB, IAASB, ISSB) for prioritising business sustainability factors, and establishing the link between ESG performance and financial performance. It presents key performance indicators (KPIs) of ESP and ESG dimensions of sustainability performance. It also provides templates for performance, risk, and disclosure; presenting cases and examples of why to disclose ESG performance, what to disclose, and where and how to disclose ESG performance information. kpmg financial statements 2022: *Shareholder Remuneration and the Law* Xuedan Xiong, 2025-06-30 This book discusses the mechanism of shareholder distribution restriction for creditor protection through an interdisciplinary lens. Identifying an optimal model of shareholder distribution regimes through a comparative study of the UK and China, the book explores how these regimes can function as a creditor protection mechanism by which distributions to shareholders are regulated to safeguard creditor interest. Calls for regulatory reforms in China have sprung from a high volume of shareholder-distribution-related litigations with inconsistent court decisions. Meanwhile, the UK adopts two models concurrently: capital maintenance rules for public companies and solvency tests for private companies. This book critically evaluates the efficacy of these two models in addressing the fundamental interest of company creditors, namely, the solvency of the company following distribution. Guided by legal transplant theories, this book examines the fit and feasibility of transplanting the UK's distribution models to China. The book will be of interest to researchers, students and practitioners in the field of company law, finance law, accounting and banking law.
