youth development specialist exam 2022: *Handbook of Equality of Opportunity*, 2024-07-12 This Handbook provides an authoritative exposition of equality of opportunity. It presents the different concepts most commonly associated with equality of opportunity, and discusses the many problems dominating the controversies on equality of opportunity at the theoretical, policy or practical level. The chapters give a concise exposition of the different conceptions and basic concepts of equal opportunities. They clarify variables that are part of the 'algorithm of equal opportunities', e.g. opportunity, equality, non-discrimination, fairness, responsibility, chance and choice, excellence, qualifications, effort, talent, merit, desert, inequality, and risk. The idea of equality of opportunity has traditionally been associated with a set of largely unquestioned ideals, and over the last 50 years, it has been at the very centre of the major progressive social changes and firmly entrenched in political rhetoric. Yet, the idea of equality of opportunity is far from unquestionable or unproblematic as the only solid assumption different conceptions have in common is their rejection of fixed social relations but not hierarchy itself. Disagreements over the fundamental principles, criticism over the inefficiency of policies aiming to ensure equal opportunities, and objections to their unfairness, all pose questions that current conceptions answer in different ways. This Handbook examines a wide variety of questions about issues of motivation, procedures, genealogy, taxonomy, and compensation.

youth development specialist exam 2022: *Early Intervention for Young Children with Disabilities* Wendi Beamish, Mantak Yuen, 2025-06-19 This book focuses on the provision of early intervention for children with disabilities (0-6 years) and their families throughout the Asia-Pacific. The motivation for the book stems from a policy brief by the Economic and Social Commission for Asia and the Pacific (ESCAP) issued in 2021. This brief urgently called for young children with disabilities to be identified and to receive intervention and support in lower-income countries throughout Asia and the Pacific. The ESCAP has estimated that at least 33% of young children with disabilities across the region currently lack any service or support to optimise their development before entering school. This book seeks to inform policy and provision within lower-income countries by providing policymakers in government and non-government organisations with practical guidelines. In particular, it presents real-world frameworks and promising programs to assist in establishing and delivering early intervention services that cater to local needs and demands. It also introduces personnel in the field to recommended intervention practices and strategies that support children with diverse disabilities across the age range birth 6 years. It also includes suggestions and strategies for supporting and collaborating with the children's families. Importantly, when blended with early child development material, these practices and strategies constitute essential topics for ongoing professional development and training activities. The concluding chapter also presents a critical analysis and synthesis of policies, service models, and programs across the Asia-Pacific region. From this analysis, recommendations are presented with likely translatability to countries at different stages of development in delivering quality early intervention to this vulnerable group of children.
