twenty lessons in environmental sociology 3rd edition free: Where the Waters Divide

Michael Mascarenhas, 2012-07-13 This timely and important scholarship advances an empirical understanding of Canada's contemporary "Indian" problem. *Where the Waters Divide* is one of the few book monographs that analyze how contemporary neoliberal reforms (in the manner of de-regulation, austerity measures, common sense policies, privatization, etc.) are woven through and shape contemporary racial inequality in Canadian society. Using recent controversies in drinking water contamination and solid waste and sewage pollution, *Where the Waters Divide* illustrates in concrete ways how cherished notions of liberalism and common sense reform — neoliberalism — also constitute a particular form of racial oppression and white privilege. *Where the Waters Divide* brings together theories and concepts from four disciplines — sociology, geography, Aboriginal studies, and environmental studies — to build critical insights into the race relational aspects of neoliberal reform. In particular, the book argues that neoliberalism represents a key moment in time for the racial formation in Canada, one that functions not through overt forms of state sanctioned racism, as in the past, but via the morality of the marketplace and the primacy of individual solutions to modern environmental and social problems. Furthermore, Mascarenhas argues, because most Canadians are not aware of this pattern of laissez faire racism, and because racism continues to be associated with intentional and hostile acts, Canadians can dissociate themselves from this form of economic racism, all the while ignoring their investment in white privilege. *Where the Waters Divide* stands at a provocative crossroads. Disciplinarily, it is where the social construction of water, an emerging theme within Cultural Studies and Environmental Sociology, meets the social construction of expertise — one of the most contentious areas within the social sciences. It is also where the political economy of natural resources, an emerging theme in Development and Globalization Studies, meets the Politics of Race Relations — an often-understudied area within Environmental Studies. Conceptually, the book stands where the racial formation associated with natural resources reform is made and re-made, and where the dominant form of white privilege is contrasted with anti-neoliberal social movements in Canada and across the globe.

twenty lessons in environmental sociology 3rd edition free: Locating Law, 3rd Edition

Elizabeth Comack, 2020-05-27T00:00:00Z Praise for the second edition: "This book is the best available for teaching the role of law in society and making sense of how it operates within the (inter)connections of race, class and gender dynamics often perpetuating oppression. ... *Locating Law* is essential for undergraduate students in justice, sociology and criminology." - Margot Hurlbert, University of Regina "Students regularly tell me that *Locating Law* is their favourite book out of the selections for the Law and Society course. The case studies are sufficiently different from one another that the students deepen their general knowledge, and they appreciate the fact that the chapters are written in a style they can understand." - Jennifer Jarman, Lakehead University A primary concern within the study of law has been to understand the "law-society" relation.

Underlying this concern is the belief that law has a distinctly social basis; it both shapes — and is shaped by — the society in which it operates. This book explores the law-society relation by locating law within the nexus of race/class/gender/sexuality relations in society. In addition to updating the material in the theoretical and substantive chapters, this third edition of *Locating Law* includes three new contributions: sentencing law and Aboriginal peoples; corporations and the law; and obscenity and indecency legislation. The analyses offered in the book are sure to generate discussion and debate and, in the process, enhance our understanding of law's location.

twenty lessons in environmental sociology 3rd edition free: *Einstein's Brain* Sal Restivo, 2019-11-19 This book reviews the research on Einstein's brain from a sociological perspective and in the context of the social brain paradigm. Instead of "Einstein, the genius of geniuses" standing on the shoulders of giants, Restivo proposes a concept of Einstein the social being standing on the shoulders of social networks. Rather than challenging Einstein's uniqueness or the uniqueness of his achievements, the book grounds Einstein and his achievements in a social ecology opposed to the myths of the "I," individualism, and the very idea of "genius." "Einstein" is defined by the particular configuration of social networks that he engaged as his life unfolded, not by biological inheritances.

twenty lessons in environmental sociology 3rd edition free: *English Classes in Slumber* S.-H. Gyemyong Ahn, Mun Woo Lee, 2020-01-01 This book explains why some Korean high school students sleep during English classes in spite of the emphasized value of English in their society. It examines how this sleeping-in-class phenomenon can be understood by means of such marginalized students' emic outlooks on themselves, the target language, their teachers, schools, and society/culture; and by means of the views of teachers who have experienced such in-class sleepers. To understand the phenomenon more holistically, it pursues a multi-disciplinary approach drawing on studies of demotivation and amotivation, psychological needs, and student experiences of schooling, as well as sociocultural theories of learning and agency and of interpersonal dynamics, among others. On the basis of a multi-modal analysis of interview data from the student and teacher participants, it theoretically interprets the phenomenon at the classroom ('micro-'), school ('meso-') and society-culture ('macro-') levels. Taking a humanistic/existential approach to education, it subsequently presents a number of cultural actions that it advocates implementing in a situation-sensitive manner to help in-class sleepers and their educational institutions awaken from their chronic slumber. Lastly, it presents practical and theoretical implications for more humanistic pedagogy, and global studies of student disengagement, in English-as-a-foreign-language classes.
