

black history month stem activities

Black History Month STEM Activities: Celebrating Innovation and Inspiring the Next Generation

black history month stem activities offer a meaningful way to honor the achievements of Black innovators and pioneers in science, technology, engineering, and mathematics. These activities not only celebrate the rich legacy of Black contributions to STEM fields but also inspire young learners to envision themselves as future scientists, engineers, and mathematicians. By integrating history with hands-on experiments and creative projects, educators and parents can create engaging experiences that highlight the significance of diversity and inclusion in STEM.

Why Incorporate Black History Month STEM Activities?

Black History Month is a crucial time to reflect on the achievements and struggles of Black individuals throughout history. When it comes to STEM, many stories of groundbreaking discoveries and inventions by Black scientists, engineers, and mathematicians remain underrepresented in traditional curricula. Incorporating Black history month STEM activities helps bridge this gap by:

- Providing role models that students can relate to and be inspired by.
- Encouraging diversity in STEM fields by showcasing contributions from underrepresented groups.
- Cultivating a deeper understanding of history intertwined with scientific progress.
- Making learning interactive and culturally relevant.

Such activities also foster critical thinking, creativity, and problem-solving skills, essential for success in STEM careers.

Engaging Black History Month STEM Activities for All Ages

Whether you're a teacher looking for classroom ideas or a parent seeking educational projects at home, there are plenty of ways to celebrate Black History Month through STEM. Here are some engaging activities tailored for different age groups:

Elementary School: Inventor Spotlight & Simple Experiments

Introducing young learners to Black inventors and scientists through storytelling combined with simple, hands-on experiments can spark curiosity early on.

- ****Inventor Storytime:**** Share stories about figures like George Washington Carver, who revolutionized agriculture with his peanut-based inventions, or Mae Jemison, the first Black woman astronaut. Follow up with a related activity, such as planting seeds to learn about plant biology.
- ****Build a Solar Oven:**** Inspired by the innovation of Black engineers, children can build a solar oven using cardboard boxes and aluminum foil. This project teaches principles of energy and sustainability while connecting to real-world applications.
- ****Pattern Recognition with Katherine Johnson:**** Introduce students to the work of NASA mathematician Katherine Johnson through pattern and number games that can be related to space exploration and calculations.

Middle School: Engineering Challenges & Coding Projects

At this stage, students are ready for more complex tasks that develop problem-solving and critical thinking skills.

- ****Bridge Building Challenge:**** Inspired by African American civil engineers, students can design and build model bridges using materials like popsicle sticks or spaghetti. This activity introduces engineering concepts such as load, tension, and compression.
- ****Coding Black History Stories:**** Using beginner-friendly coding platforms like Scratch, students can create interactive stories or animations about notable Black scientists and inventors. This combines computer science skills with historical research.
- ****Chemical Reactions with Percy Julian:**** Explore chemistry by recreating simple chemical reactions, honoring Percy Julian, a pioneer in synthetic chemistry. Activities can include making slime or observing color changes in pH indicators.

High School: Research Projects & Advanced STEM Applications

Older students can delve deeper into complex topics, exploring both the historical context and scientific principles behind Black innovators' contributions.

- ****Research Presentations:**** Assign students to research Black pioneers in various STEM fields, such as Dr. Shirley Ann Jackson in physics or Mark Dean in computer engineering, and present their findings with an emphasis on the scientific impact and social challenges these individuals faced.
- ****Robotics and AI Projects:**** Challenge students to design robots or AI algorithms that solve real-world problems, inspired by the innovations of Black engineers and computer scientists.
- ****Mathematical Modeling:**** Engage students in modeling real-world phenomena, linking back to the work of mathematicians like David Blackwell, and discussing how mathematics can be used to tackle societal issues.

Highlighting Black STEM Role Models Throughout History

A key component of Black history month stem activities is highlighting the stories behind the science. Here are a few inspiring figures whose legacies can be woven into lessons and projects:

- **Mae Jemison:** The first Black woman in space, Jemison's journey exemplifies the intersection of science, technology, and perseverance.
- **George Washington Carver:** Known for his innovative agricultural techniques and inventions, Carver's work teaches environmental science and sustainability.
- **Katherine Johnson:** Her mathematical calculations were critical to NASA's space missions, illustrating the importance of applied math.
- **Percy Julian:** A trailblazer in synthetic chemistry who developed medicines that saved millions.
- **Mark Dean:** Co-inventor of the personal computer, his story highlights engineering and computer science.

By integrating narratives about these scientists into STEM activities, students gain a more comprehensive understanding of both the scientific concepts and the cultural significance behind them.

Tips for Creating Inclusive and Impactful STEM Activities

When planning Black history month stem activities, consider the following tips to maximize engagement and educational value:

- **Make it hands-on:** Interactive experiments and projects help learners connect theory with practice.
- **Connect history with modern applications:** Link past achievements with current STEM careers and technologies to demonstrate ongoing relevance.
- **Use diverse resources:** Incorporate books, videos, podcasts, and guest speakers from diverse backgrounds to enrich the learning experience.
- **Encourage creativity:** Allow students to design their own projects inspired by Black innovators, fostering ownership and innovation.
- **Promote collaboration:** Group activities can enhance communication skills and expose students to multiple perspectives.

These approaches create a dynamic learning environment that values diversity and stimulates interest in STEM.

Resources to Support Black History Month STEM Activities

Educators and parents looking for ready-made materials and inspiration can tap into a variety of resources dedicated to Black history and STEM education:

- **NASA's "Hidden Figures" Curriculum:** Lesson plans and activities

inspired by the women of NASA, including Katherine Johnson.

- **The National Society of Black Engineers (NSBE):** Offers workshops, mentorship programs, and educational materials.
- **Black Inventor Online Museum:** A rich collection of biographies and inventions that can be integrated into lesson plans.
- **STEM-themed books and biographies:** Titles like “Mae Among the Stars” and “Hidden Figures” provide accessible stories for young readers.
- **YouTube Channels and Podcasts:** Platforms featuring interviews and documentaries about Black scientists and engineers.

Using these resources helps ensure that Black history month stem activities are accurate, engaging, and educational.

Black history month stem activities open the door to a vibrant exploration of science, technology, engineering, and math through the lens of cultural heritage and achievement. They empower students by connecting them to inspiring role models and hands-on experiences that highlight the power of innovation and diversity in shaping our world. Whether through building bridges, coding stories, or studying chemical reactions, these activities foster a sense of belonging and possibility for all learners.

Frequently Asked Questions

What are some engaging STEM activities for Black History Month?

Engaging STEM activities for Black History Month include building circuits inspired by African American inventors, coding projects featuring stories of Black scientists, and designing engineering challenges based on innovations by Black engineers.

How can educators incorporate Black History Month into STEM lessons?

Educators can incorporate Black History Month into STEM lessons by highlighting the contributions of Black scientists and inventors, using biographies as case studies, creating projects that simulate their inventions, and encouraging critical discussions about diversity in STEM fields.

Who are some notable Black figures in STEM to feature during Black History Month?

Notable Black figures in STEM include Katherine Johnson, Mae Jemison, George Washington Carver, Garrett Morgan, and Dr. Shirley Ann Jackson. Featuring their achievements can inspire students during Black History Month activities.

Are there any free resources for Black History Month STEM activities?

Yes, many organizations offer free resources, such as NASA's STEM engagement materials featuring Black scientists, the Smithsonian's Black History Month

STEM activities, and lesson plans from educational websites like TeachEngineering and STEMfinity.

What age groups can benefit from Black History Month STEM activities?

Black History Month STEM activities can be adapted for all age groups, from elementary students learning about basic principles through hands-on experiments to high school and college students engaging in complex projects and research related to Black innovators.

How do Black History Month STEM activities promote diversity and inclusion?

These activities promote diversity and inclusion by celebrating the achievements of Black individuals in STEM, challenging stereotypes, encouraging underrepresented students to pursue STEM careers, and fostering a more inclusive learning environment.

Can Black History Month STEM activities be done virtually?

Yes, many Black History Month STEM activities can be conducted virtually, such as interactive coding projects, virtual lab simulations, online biographies and documentaries, and remote collaborative engineering challenges.

What are some hands-on Black History Month STEM projects for kids?

Hands-on projects for kids include creating simple circuits inspired by Lewis Latimer's work, building model bridges or vehicles honoring Black engineers, and conducting science experiments that relate to discoveries by Black scientists like George Washington Carver.

How can parents support Black History Month STEM learning at home?

Parents can support learning by providing books and videos about Black STEM pioneers, encouraging participation in related online workshops or kits, facilitating simple STEM experiments, and discussing the importance of diversity in science and technology during Black History Month.

Additional Resources

Black History Month STEM Activities: Celebrating Innovation and Inspiring Future Generations

black history month stem activities have gained significant prominence as educators, communities, and organizations seek to honor the contributions of Black scientists, engineers, technologists, and mathematicians. These activities not only celebrate the rich legacy of Black innovators but also aim to inspire students, particularly from underrepresented backgrounds, to

engage with STEM fields. By integrating historical context with hands-on learning, Black History Month STEM activities offer a dynamic platform to bridge cultural heritage and contemporary education.

The Importance of Black History Month STEM Activities

The STEM (Science, Technology, Engineering, and Mathematics) pipeline has historically underrepresented Black individuals, with persistent disparities in access, retention, and achievement. Black History Month STEM activities serve as both a commemorative and educational tool, highlighting the achievements of Black pioneers who shaped these disciplines despite systemic barriers. These initiatives provide visibility to role models, thus fostering a sense of belonging and motivation among young learners.

Studies show that representation significantly impacts student engagement and self-efficacy in STEM fields. According to a 2021 report by the National Science Foundation, Black students are underrepresented in STEM degree attainment, comprising only about 9% of STEM bachelor's degrees awarded in the United States. By incorporating Black History Month STEM activities into curricula and extracurricular programs, educators can challenge stereotypes and encourage a more diverse generation of STEM professionals.

Designing Effective Black History Month STEM Activities

Successful Black History Month STEM activities blend education with experiential learning. The goal is to connect historical achievements with practical applications that students can explore firsthand. Effective programs often include storytelling, project-based learning, and interactive challenges that highlight innovation and creativity.

Key Features to Consider

- **Historical Context:** Integrating biographies and stories of Black inventors and scientists such as George Washington Carver, Mae Jemison, Katherine Johnson, and Elijah McCoy.
- **Hands-On Projects:** Activities that allow students to experiment, build, or code, reinforcing STEM concepts while honoring Black innovators.
- **Cross-Disciplinary Learning:** Combining STEM with social studies and literature to provide a holistic understanding of contributions and challenges.
- **Accessibility:** Ensuring materials and activities are inclusive and adaptable for diverse learning environments and age groups.

Examples of Black History Month STEM Activities

One popular approach is engineering challenges inspired by historical inventions. For instance, students might recreate simple machines based on Elijah McCoy's lubrication devices or design space missions reflecting Mae Jemison's astronaut experiences. Coding workshops can focus on algorithms that solve real-world problems, accompanied by discussions about Black computer scientists like Mark Dean.

Another compelling activity is the "STEM Trailblazers" research project, where students investigate and present on influential figures such as Dr. Shirley Jackson or Dr. Lonnie Johnson. This not only deepens historical knowledge but also hones research and communication skills.

The Role of Educational Institutions and Organizations

Schools, museums, and STEM organizations play a crucial role in promoting Black History Month STEM activities. Curriculum developers are increasingly incorporating themed lesson plans that align with state and national standards, ensuring that these activities support core learning objectives.

Community organizations like the National Society of Black Engineers (NSBE) and Black Girls Code provide specialized programs during Black History Month, ranging from workshops to mentorship opportunities. These initiatives are instrumental in creating sustained interest and support networks for Black youth in STEM.

Challenges and Opportunities

While the benefits of Black History Month STEM activities are clear, challenges remain. Limited resources and time constraints in schools can hinder implementation. Additionally, some activities may inadvertently focus too heavily on historical facts without engaging students in active STEM problem-solving.

To address this, educators are encouraged to adopt a balanced approach that not only educates about past achievements but also stimulates curiosity and innovation. Digital platforms and virtual labs offer scalable solutions, enabling wider access to quality STEM experiences during the month and beyond.

Measuring Impact and Future Directions

Assessment of Black History Month STEM activities often involves qualitative feedback from participants and educators, focusing on engagement levels and shifts in attitudes toward STEM fields. Some programs incorporate pre- and post-activity surveys to gauge changes in interest or self-confidence.

Emerging trends suggest that integrating technology such as augmented reality (AR) and virtual reality (VR) could enhance immersive learning experiences.

Imagine students virtually exploring the NASA missions led by Black astronauts or simulating engineering feats by Black inventors, deepening both knowledge and excitement.

Moreover, expanding these activities beyond February into year-round curricula can reinforce ongoing commitment to diversity and inclusion within STEM education.

Black History Month STEM activities represent a vital intersection of heritage and innovation. By thoughtfully combining recognition of past trailblazers with engaging educational experiences, these initiatives play a pivotal role in shaping a more inclusive future for STEM fields.

black history month stem activities: Leadership in Integrative STEM Education Rachel Louise Geesa, Mary Annette Rose, Krista Marie Stith, 2021-11-30 In the face of complex local and global problems, there is a critical need to prepare PK-12 students to be innovative, resilient problem-solvers and well-equipped STEM-literate citizens. With focus upon integrated content, college and career readiness, authentic problems, and action-oriented pedagogies, integrative STEM education provides a promising approach to address this challenge. Integrative STEM programming with its fusion of science, mathematics, engineering, and technology content and practices may manifest in a variety of ways: Teachers co-plan an engineering design experience within a social studies class. A community business partner offers a job-shadowing experience. Students engage in an after-school program at a makerspace. Educators collaboratively re-envision and interweave STEM across the curriculum. And more... Current and future educational leaders striving to improve STEM programming will find this book to be a useful resource. Its introduction offers an orientation to the fundamental goals, principles, and practices of integrative STEM education. While later chapters delve into the facets of STEM programming and the competencies of STEM leadership which form the foundation of a coherent program. These evidence-based strategies, examples, and resources may provide inspiration to leaders as they initiate and enhance an equitable integrative STEM culture within their school.

black history month stem activities: STEM for All Leena Bakshi McLean, 2024-10-18 Help close the STEM gap through theory and practical tools Containing all of the practical tools needed to put theory into practice, STEM for All by Leena Bakshi McLean provides a roadmap for teachers, instructional coaches, and leaders to better understand the challenges that create low engagement and scores in STEM subjects and implement exciting and culturally relevant teaching plans. This book covers a wealth of key topics surrounding the subject, including classroom culture, discourse, identity, and belonging, family and community participation, and justice-centered core learning. This book uses the Connect, Create, and Cultivate framework from STEM4Real, an organization that provides socially just and culturally relevant STEM teaching and standards-based learning strategies, combined with stories and case studies of real students throughout to provide context for key concepts. In this book, readers will learn about: Six pillars that can throw off the foundation of a classroom, including non-inclusive curriculum and lack of equal access Moments of triumph and

resilience that can be used to navigate rocky and recalcitrant relationships Implicit and unconscious biases that can unravel our impact despite our best intentions STEM for All earns a well-deserved spot on the bookshelves of all educators motivated to close the STEM gap and better prepare their students for future college and career opportunities in math and science fields.

black history month stem activities: *US Black Engineer & IT* , 2012

black history month stem activities: *US Black Engineer & IT* , 2012

black history month stem activities: *Multicultural Math Fun* Louise Bock, Susan Guengerich, Hope Martin, 1997 Multicultural Math Fun celebrates math through 54 multicultural activities tied to holidays, celebrations, and events throughout the year. Students build problem-solving and reasoning skills, while making mathematical connections -- and having fun! A short list of the many activities and topics includes: Mexican Independence Day -- and the mathematics associated with creating a Mexican feast! Halloween -- with counting activities for the candy you collect! Hanukkah -- and the odds you face when playing dreidel! Groundhog Day -- and the art of measuring shadows! Summer Olympic Games -- and the matrices you can develop to count medals!

black history month stem activities: *Empowering Underrepresented Students in Science*

Sonji Johnson-Anderson, Ranjana Lingutla, Margaret Riley, 2021-09-23 Empowering Underrepresented Students in Science: STEM Students Speak chronicles the best practices of a STEM retention program for underrepresented minority students (URM) at a public university. Written mostly as an engaging series of vignettes, this story invites its audience to examine the underbelly of this successful program. It reveals to readers what lies at the heart of creating and sustaining a STEM retention program that is as inviting as it is vital. The program's practice of reflection helps to build students' self-efficacy and self-understanding. This book addresses the problem of merely throwing resources at a program to have it only achieve mild success. Most STEM retention/support programs offer a litany of things they think are necessary for students, especially traditionally underserved students, to survive in STEM. We contend that our program goes beyond merely throwing money at a need, to critically assessing the need through the lens of inclusive practices. Our program attempts to engage with the whole selves of the students we serve. - Proposes a focused, strategic approach to offering support to underrepresented minority (URM) students - Shares easily reproducible ways to build a STEM support program to replicate the success at UMASS AP - Features an engaging, readable style with real-world applications

black history month stem activities: *February Monthly Collection, Grade 5* , 2018-01-11

The February Monthly Collection for fifth grade is aligned to current state standards and saves valuable prep time for centers and independent work. The included February calendar is filled with notable events and holidays, and the included blank calendar is editable, allowing the teacher to customize it for their classroom. Student resource pages are available in color and black and white. Additional collection resources include: •Informational reading •Poetry •Writing project •Grammar review •Volume •Graphing •Area and perimeter •STEM •Presidents Day •African American History The February Monthly Collection for fifth grade can be used in or out of the classroom to fit the teachers' needs and help students stay engaged. Each Monthly Collection is designed to save teachers time, with grade-appropriate resources and activities that can be used alongside classroom learning, as independent practice, center activities, or homework. Each one includes ELA, Math, and Science resources in a monthly theme, engaging students with timely and interesting content. All Monthly Collections include color and black and white student pages, an answer key, and editable calendars for teachers to customize.

black history month stem activities: *Racism and African American Mental Health* Janeé

M. Steele, 2024-09-05 Racism and African American Mental Health examines the psychological impacts of racism within the African American community and offers a culturally adapted model of cognitive behavior therapy for more culturally relevant case conceptualization and treatment planning with this population. Readers of this text will gain a greater understanding of how manifestations of racism contribute to the development of psychological distress among African

Americans and learn specific strategies to address the negative automatic thoughts and maladaptive beliefs that develop in response to racism. Reflection questions and guided practice are incorporated throughout the text to assist readers with application of the strategies discussed in their own clinical settings.

black history month stem activities: Science Blogging Christie Wilcox, Bethany Brookshire, Jason G. Goldman, 2016-03-01 Here is the essential how-to guide for communicating scientific research and discoveries online, ideal for journalists, researchers, and public information officers looking to reach a wide lay audience. Drawing on the cumulative experience of twenty-seven of the greatest minds in scientific communication, this invaluable handbook targets the specific questions and concerns of the scientific community, offering help in a wide range of digital areas, including blogging, creating podcasts, tweeting, and more. With step-by-step guidance and one-stop expertise, this is the book every scientist, science writer, and practitioner needs to approach the Wild West of the Web with knowledge and confidence.

black history month stem activities: February Monthly Collection, Grade 3 , 2018-01-11 The February Monthly Collection for third grade is aligned to current state standards and saves valuable prep time for centers and independent work. The included February calendar is filled with notable events and holidays, and the included blank calendar is editable, allowing the teacher to customize it for their classroom. Student resource pages are available in color and black and white. Additional collection resources include: •Informational reading •Poetry •Prefixes •Homophones •Dictionary skills •Measurement •Polygons •STEM •Dental Hygiene •Presidents Day •African American History The February Monthly Collection for third grade can be used in or out of the classroom to fit the teachers' needs and help students stay engaged. Each Monthly Collection is designed to save teachers time, with grade-appropriate resources and activities that can be used alongside classroom learning, as independent practice, center activities, or homework. Each one includes ELA, Math, and Science resources in a monthly theme, engaging students with timely and interesting content. All Monthly Collections include color and black and white student pages, an answer key, and editable calendars for teachers to customize. This resource may be printed and photocopied for use in a single classroom only.

black history month stem activities: Frederick Douglass Monica Dorsey, 2020-07-11 Delve beyond basic biographies! Experience a MONTH worth of learning with easy to follow, parent-led lesson plans and hands-on activities designed to engage our youngest learners. □ Are you looking for bright, fun African American children activity books that holds the interest of Pre-K and Kindergarten aged children? □ Are you disappointed by the availability of black history homeschool curriculum for curious young learners? □ Would you like to share meaningful parent child interaction with black history education games? □ Are you worried the lack of Black history taught in school will hurt your child's self-esteem? □ Do you want to teach your child African-American history at home but can't find an age appropriate Black History Lesson Plan for Kids to support a positive self-image? Welcome to Black History Activities for Young Learners - a new Black history homeschool curriculum featuring parent led Black history homeschool curriculum for kids ages 4-6. These carefully crafted activities stimulate young minds as your child learns about American history and themselves. You are your child's first teacher. We give you the tools with: AGE-APPROPRIATE SUBJECTS: Created with young children in mind, our black history activities for kids feature notable Americans and their positive contributions. PARENT FRIENDLY INSTRUCTIONS: African American homeschooling has never been easier. Designed for teaching parent to teaching parents, instructions are clearly stated without complicated jargon. Easy-to-follow Ready, Set, Go lesson framework will have you ready to teach in a matter of minutes. ALL-IN-ONE ACTIVITIES: No need to hunt down a lengthy craft supply list. This Frederick Douglass pack has everything needed for interactive learning. If you have kid friendly scissors, a pencil and a glue stick you are good to go. HOURS OF ENTERTAINMENT: Not just worksheets or black history flashcards suited to older children. Activity packs features bright appealing colors to hold the child's attention The Black History Activities for Young Learners Series is designed for hands on learning. We don't do long biographies with

predictable multiple choice questions. This engaging Frederick Douglass bundle includes black history games for kids and covers a long list of subjects such as vocabulary building, STEM games, confidence building activities, writing exercises, active listening, verbal communication games, critical thinking games, arts and crafts and more. All while introducing children ages 4-6 to empowering figures in American history. Try one out today!

black history month stem activities: Everyday Antiracism Mica Pollock, 2008-06-30 Winner, Gustavus Myers Outstanding Book Award The groundbreaking book on race in schools that has become an essential handbook for teachers working to create antiracist classrooms In the wake of the Black Lives Matter movement and nationwide protests against police brutality, it's never been more important for educators and parents to ensure they're cultivating antiracist learning environments. For years, teachers who recognized the importance of cultural responsiveness in the classroom have turned to Everyday Antiracism, the essential compendium of advice from some of America's leading educators. Pathbreaking contributors—among them Beverly Daniel Tatum, Sonia Nieto, and Pedro Noguera—describe concrete ways to analyze classroom interactions that may or may not be “racial,” deal with racial inequality and “diversity,” and teach to high standards across racial lines. Topics range from using racial incidents as teachable moments and responding to the “n-word” to valuing students’ home worlds, dealing daily with achievement gaps, and helping parents fight ethnic and racial misconceptions about their children. Questions following each essay prompt readers to examine and discuss everyday issues of race and opportunity in their own classrooms and schools. Everyday Antiracism is an essential tool for all of the educators and parents who are determined to create not only more just classrooms, but also a more just world. Contributors include: Eduardo Bonilla-Silva Prudence Carter Thea Abu El-Haj Ron Ferguson Patricia Gándara Ian Haney López Vivian Louie Maria Ong Paul Ongtooguk Christine Sleeter Angela Valenzuela

black history month stem activities: The Wisconsin Environmental Education Board ... Grant Recipients Wisconsin Environmental Education Board, 2013

black history month stem activities: *Women of Color* , 2012 *Women of Color* is a publication for today's career women in business and technology.

black history month stem activities: February Monthly Collection, Grade K , 2018-01-11 The February Monthly Collection for kindergarten is aligned to current state standards and saves valuable prep time for centers and independent work. The included February calendar is filled with notable events and holidays, and the included blank calendar is editable, allowing the teacher to customize it for their classroom. Student resource pages are available in color and black and white. Additional collection resources include: •Reading comprehension •Infographics •Rhyming •Short Vowels •Digraphs •Counting to 20 •Making sets •Shapes •STEM •Dental Hygiene •Presidents Day •African American History The February Monthly Collection for kindergarten can be used in or out of the classroom to fit the teachers’ needs and help students stay engaged. Each Monthly Collection is designed to save teachers time, with grade-appropriate resources and activities that can be used alongside classroom learning, as independent practice, center activities, or homework. Each one includes ELA, Math, and Science resources in a monthly theme, engaging students with timely and interesting content. All Monthly Collections included color and black and white student pages, an answer key, and editable calendars for teachers to customize.

black history month stem activities: Got Blood to Give OmiSoore H. Dryden, 2024-11-18T00:00:00Z Our blood has stories to tell, and we are told stories about blood. Globally, blood is a story that is built — whose blood counts, whose blood spills and whose blood is of use. The history of blood donation practices in Canada speaks to the larger blood story of anti-Black racism, evident since the country’s founding. Through storytelling, theorizing and discourse analysis, *Got Blood to Give* examines how anti-Black homophobic nation-building policies became enshrined in blood donation systems. OmiSoore H. Dryden, a Black queer femme academic and the foremost

scholar on Canadian blood donation practices, examines contaminated blood crises in the 1980s and 1990s, Canadian Red Cross Society, and Canadian Blood Services. She contextualizes contemporary homonationalisms, medical anti-Black racism, homophobia and transphobia in blood-related practices, connecting blood stories with health disparities affecting Black and Black queer populations. From a BlaQueer diasporic theoretical lens, this book uses narrative as method to show how healthcare systems continue to propagate anti-Blackness.

black history month stem activities: Reach for the Visionary Woman of God Avis Winifred, 2010-07-30 REACH for the Visionary Woman of God will help the centered Christian woman think seriously, live faithfully, and develop a plan to fulfill the godly vision burning in her heart. A vision crafted by God has both earthly and heavenly intentions for those known and unknown. Thus, prayer, steadfastness, biblical study, and an unrelenting faith are required for the non-compromising Woman of REACH. A man's heart plans his way, But the LORD directs his steps. (Proverbs 16:9, NKJV)

black history month stem activities: Encyclopedia of African American Popular Culture Jessie Smith, 2010-12-17 This four-volume encyclopedia contains compelling and comprehensive information on African American popular culture that will be valuable to high school students and undergraduates, college instructors, researchers, and general readers. From the Apollo Theater to the Harlem Renaissance, from barber shop and beauty shop culture to African American holidays, family reunions, and festivals, and from the days of black baseball to the era of a black president, the culture of African Americans is truly unique and diverse. This diversity is the result of intricate customs forged in tightly woven communities—not only in the United States, but in many cases also stemming from the traditions of another continent. Encyclopedia of African American Popular Culture presents information in a traditional A-Z organization, capturing the essence of the customs of African Americans and presenting this rich cultural heritage through the lens of popular culture. Each entry includes historical and current information to provide a meaningful background for the topic and the perspective to appreciate its significance in a modern context. This encyclopedia is a valuable research tool that provides easy access to a wealth of information on the African American experience.

black history month stem activities: Congressional Record United States. Congress, 2006 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)
