arts of china fifth edition michael sullivan: The China Collectors Karl E. Meyer, Shareen Blair Brysac, 2025-06-25 Thanks to Salem sea captains, Gilded Age millionaires, curators on horseback and missionaries gone native, North American museums now possess the greatest collections of Chinese art outside of East Asia itself. How did it happen? *The China Collectors* is the first full account of a century-long treasure hunt in China from the Opium Wars and the Boxer Rebellion to Mao Zedong's 1949 ascent. The principal gatherers are mostly little known and defy invention. They included foreign devils who braved desert sandstorms, bandits and local warlords in acquiring significant works. Adventurous curators like Langdon Warner, a forebear of Indiana Jones, argued that the caves of Dunhuang were already threatened by vandals, thereby justifying the removal of frescoes and sculptures. Other Americans include George Kates, an alumnus of Harvard, Oxford and Hollywood, who fell in love with Ming furniture. The Chinese were divided between dealers who profited from the artworks' removal, and scholars who sought to protect their country's patrimony. Duanfang, the greatest Chinese collector of his era, was beheaded in a coup and his splendid bronzes now adorn major museums. Others in this rich tapestry include Charles Lang Freer, an enlightened Detroit entrepreneur, two generations of Rockefellers, and Avery Brundage, the imperious Olympian, and Arthur Sackler, the grand acquirer. No less important are two museum directors, Cleveland's Sherman Lee and Kansas City's Laurence Sickman, who challenged the East Coast's hegemony. Shareen Blair Brysac and Karl E. Meyer even-handedly consider whether ancient treasures were looted or salvaged, and whether it was morally acceptable to spirit hitherto inaccessible objects westward, where they could be studied and preserved by trained museum personnel. And how should the US and Canada and their museums respond now that China has the means and will to reclaim its missing patrimony?

arts of china fifth edition michael sullivan: Art for Social Change and Cultural Awakening Wei Hsiu Tung, 2013-09-05 Artistic residency has become widely adopted in Western countries while only recently having become popular and well-supported within Taiwan. This book explores the challenges that this form of art practice faced in contemporary Taiwan from the revocation of Martial Law in 1987 to the 2000s—arguably one of the most exciting periods in the sociocultural history of the island. Case studies show what is at stake politically, historically, and socially in artists' endeavours to give shape to a sense of Taiwanese identity. Despite the prevalence of artists engaged in social issues in today's world and the undeniable contributions of artistic residency to contemporary art practice, little literature or scholarly research has been conducted on the practical, conceptual, and ideological aspects of artist residency. Very often, it is perceived in very narrow terms, overlooking explicit or hidden issues of localism, nationalism and globalization. If artistic residence did indeed emerge from the radical movements of the 1960s and 70s in the Western world—and especially Britain—then this book argues that the contemporary sociocultural context of Taiwan calls for redefined, culturally-specific models of residency. The precarious geo-political situation of Taiwan has made issues of cultural identity—tackled by artists and successive governments alike—very sensitive. A new genre of artistic residence in Taiwan would mean that artists involved from whatever cultural background operate as engaging interpreters; their roles would not be confined to mirroring culture and society. These artists-in-residence would contribute to cultural awakening by offering ways of negotiating creatively with otherness, and this for the sake of a better social life and shared identity.

arts of china fifth edition michael sullivan: A New History of the Humanities Rens Bod, 2013-11-14 Many histories of science have been written, but A New History of the Humanities offers the first overarching history of the humanities from Antiquity to the present. There are already historical studies of musicology, logic, art history, linguistics, and historiography, but this volume gathers these, and many other humanities disciplines, into a single coherent account. Its central theme is the way in which scholars throughout the ages and in virtually all civilizations have sought to identify patterns in texts, art, music, languages, literature, and the past. What rules can we apply if we wish to determine whether a tale about the past is trustworthy? By what criteria are we to distinguish consonant from dissonant musical intervals? What rules jointly describe all possible grammatical sentences in a language? How can modern digital methods enhance pattern-seeking in the humanities? Rens Bod contends that the hallowed opposition between the sciences (mathematical, experimental, dominated by universal laws) and the humanities (allegedly concerned with unique events and hermeneutic methods) is a mistake born of a myopic failure to appreciate the pattern-seeking that lies at the heart of this inquiry. A New History of the Humanities amounts to a persuasive plea to give Panini, Valla, Bopp, and countless other often overlooked intellectual giants their rightful place next to the likes of Galileo, Newton, and Einstein.

arts of china fifth edition michael sullivan: Art and Artists of Twentieth-Century China Michael Sullivan, 2023-12-22 This visually stunning book focuses on the rebirth of Chinese art in the twentieth century under the influence of Western art and culture. Michael Sullivan, recognized throughout the world as a leading scholar of Chinese art, vividly documents the conflicting pulls of traditional and Western values on Chinese art and provides 364 illustrations, in color and black-and-white, to show the great range of artistic expression and the historical processes that occurred within various movements. A substantial biographical index of twentieth-century Chinese artists is a valuable addition to the text. Sullivan discusses artists and their work against China's

background of oppression and relaxation, despair and hope. He expertly conveys the diverse and at times bizarre intertwining of Chinese cultural history and art during this century. Included are the intense debates between traditionalists and reformers, the creation of the first art schools, and the birth of the idea—shocking in ethnocentric China—that art is a world language that obliterates all frontiers. The scholarly traditions of classical Chinese painting, the belated discovery of Western modernism, the artistic upheaval under Communism, and China's rethinking of the very nature of art all have a place in Sullivan's fascinating history. Michael Sullivan has known many of the major figures in China's modern art movement of the 1930s and 1940s and has also gained the confidence of younger artists who rose to prominence following the 1979 Peking Spring. This long-awaited book—richly documented and abundantly illustrated—is a capstone to Sullivan's work and will be enthusiastically welcomed by art lovers everywhere.

arts of china fifth edition michael sullivan: Chinese Art and Dynastic Time Wu Hung, 2022-05-03 A sweeping look at Chinese art across the millennia that upends traditional perspectives and offers new pathways for art history Throughout Chinese history, dynastic time—the organization of history through the lens of successive dynasties—has been the dominant mode of narrating the story of Chinese art, even though there has been little examination of this concept in discourse and practice until now. Chinese Art and Dynastic Time uncovers how the development of Chinese art was described in its original cultural, sociopolitical, and artistic contexts, and how these narratives were interwoven with contemporaneous artistic creation. In doing so, leading art historian Wu Hung opens up new pathways for the consideration of not only Chinese art, but also the whole of art history. Wu Hung brings together ten case studies, ranging from the third millennium BCE to the early twentieth century CE, and spanning ritual and religious art, painting, sculpture, the built environment, and popular art in order to examine the deep-rooted patterns in the historical conceptualization of Chinese art. Elucidating the changing notions of dynastic time in various contexts, he also challenges the preoccupation with this concept as the default mode in art historical writing. This critical investigation of dynastic time thus constitutes an essential foundation to pursue new narrative and interpretative frameworks in thinking about art history. Remarkable for the sweep and scope of its arguments and lucid style, Chinese Art and Dynastic Time probes the roots of the collective imagination in Chinese art and frees us from long-held perspectives on how this art should be understood. A Chengdu residential complex for 200,000 recreates Dorchester, England. An ersatz Queen's Guard patrols Shanghai's Thames Town, where pubs and statues of Winston Churchill abound. Gleaming replicas of the White House dot Chinese cities from Fuyang to Shenzhen. These examples are but a sampling of China's most popular and startling architectural movement: the construction of monumental themed communities that replicate towns and cities in the West. Original Copies presents the first definitive chronicle of this remarkable phenomenon in which entire townships appear to have been airlifted from their historic and geographic foundations in Europe and the Americas, and spot-welded to Chinese cities. These copycat constructions are not theme parks but thriving communities where Chinese families raise children, cook dinners, and simulate the experiences of a pseudo-Orange County or Oxford. In recounting the untold and evolving story of China's predilection for replicating the greatest architectural hits of the West, Bianca Bosker explores what this unprecedented experiment in "duplitecture" implies for the social, political, architectural, and commercial landscape of contemporary China. With her lively, authoritative narrative, the author shows us how, in subtle but important ways, these homes and public spaces shape the behavior of their residents, as they reflect the achievements, dreams, and anxieties of those who inhabit them,

as well as those of their developers and designers. From Chinese philosophical perspectives on copying to twenty-first century market forces, Bosker details the factors giving rise to China's new breed of building. Her analysis draws on insights from the world's leading architects, critics and city planners, and on interviews with the residents of these developments.

arts of china fifth edition michael sullivan: The Zoomorphic Imagination in Chinese Art and Culture Jerome Silbergeld, Eugene Y. Wang, 2016-10-31 China has an age-old zoomorphic tradition. The First Emperor was famously said to have had the heart of a tiger and a wolf. The names of foreign tribes were traditionally written with characters that included animal radicals. In modern times, the communist government frequently referred to Nationalists as "running dogs," and President Xi Jinping, vowing to quell corruption at all levels, pledged to capture both "the tigers" and "the flies." Splendidly illustrated with works ranging from Bronze Age vessels to twentieth-century conceptual pieces, this volume is a wide-ranging look at zoomorphic and anthropomorphic imagery in Chinese art. The contributors, leading scholars in Chinese art history and related fields, consider depictions of animals not as simple, one-for-one symbolic equivalents: they pursue in depth, in complexity, and in multiple dimensions the ways that Chinese have used animals from earliest times to the present day to represent and rhetorically stage complex ideas about the world around them, examining what this means about China, past and present. In each chapter, a specific example or theme based on real or mythic creatures is derived from religious, political, or other sources, providing the detailed and learned examination needed to understand the means by which such imagery was embedded in Chinese cultural life. Bronze Age taotie motifs, calendrical animals, zoomorphic modes in Tantric Buddhist art, Song dragons and their painters, animal rebuses, Heaven-sent auspicious horses and foreign-sent tribute giraffes, the fantastic specimens depicted in the Qing Manual of Sea Oddities, the weirdly indeterminate creatures found in the contemporary art of Huang Yong Ping—these and other notable examples reveal Chinese attitudes over time toward the animal realm, explore Chinese psychology and patterns of imagination, and explain some of the critical means and motives of Chinese visual culture. The Zoomorphic Imagination in Chinese Art and Culture will find a ready audience among East Asian art and visual culture specialists and those with an interest in literary or visual rhetoric. arts of china fifth edition michael sullivan: Chinese Religious Art Patricia Eichenbaum Karetzky, 2013-12-19 Chinese Religious Art is a broad survey of the origins and development of the various forms of artistic expression of Chinese religions. The study begins with an overview of ancient archaeology in order to identify nascent religious ideologies in various Neolithic Cultures and early Chinese historical eras including the Shang dynasty (1300-1050 BCE) and Zhou Dynasty (1000-221 BCE) up until the era of the First Emperor (221-210 BCE) Part Two treats Confucianism as a religious tradition examining its scriptures, images, temples and rituals. Adopted as the state ideology in the Han dynasty, Confucian ideas permeated society for over two thousand years. Filial piety, ethical behavior and other principles shaped the pictorial arts. Part Three considers the various schools of Daoist belief and their expression in art. The ideas of a utopian society and the pursuit of immortality characterize this religion from its earliest phase. Daoism has an elaborate pantheon and ritualistic art, as well as a secular tradition best expressed in

monochrome ink painting. Part Four covers the development of Buddhist art beginning with its entry into China in the second century. Its monuments—comprised largely of cave temples carved high in the mountains along the frontiers of China and large metropolitan temples—provide evidence of its evolution including the adoption of savior cults of the Buddha of the Western Paradise, the Buddha of the Future, the rise of Ch'an (Zen) and esoteric Buddhism. In their development, these various religious traditions interacted, sharing art, architecture, iconography and rituals. By the twelfth century a stage of syncretism merged all three traditions into a popular religion. All the religions are reviving after their extirpation during the Cultural Revolution. Using historical records and artistic evidence, much of which has not been published, this study examines their individual and shared manner of worshipping the divine forces.
