1 1 2 imperialism case study answer key: Paul's Letter to the Romans and Roman

Imperialism Ian E Rock, 2017-05-25 Ian E. Rock demonstrates that the Letter to the Romans may be seen as an attempt by a subordinate group to redress actual and potential issues of confrontation with the Empire and to offer hope, even in the face of death. Paul demonstrates that it is God's peace and not Rome's peace that is important; that loyalty to the exalted Jesus as Lord and to the kingdom of God - not Jupiter and Rome - leads to salvation; that grace flows from Jesus as Christ and Lord and not from the benefactions of the Emperor. If the resurrection of Jesus - the crucified criminal of the Roman Empire - demonstrates God's power over the universe and death, the very instrument of Roman control, then the Christ-believer is encouraged to face suffering and death in the hope of salvation through this power. Paul's theology emerges from, and is inextricably bound to, the politics of his day, the Scriptures of his people, and to the critical fact that the God who is One and Lord of all is still in charge of the world.

1 1 2 imperialism case study answer key: The Environmental Humanities Robert S. Emmett, David E. Nye, 2017-10-13 A concise overview of this multidisciplinary field, presenting key concepts, central issues, and current research, along with concrete examples and case studies. The emergence of the environmental humanities as an academic discipline early in the twenty-first century reflects the growing conviction that environmental problems cannot be solved by science and technology alone. This book offers a concise overview of this new multidisciplinary field, presenting concepts, issues, current research, concrete examples, and case studies. Robert Emmett and David Nye show how humanists, by offering constructive knowledge as well as negative critique, can improve our understanding of such environmental problems as global warming, species extinction, and over-consumption of the earth's resources. They trace the genealogy of environmental humanities from European, Australian, and American initiatives, also showing its cross-pollination by postcolonial and feminist theories. Emmett and Nye consider a concept of place not synonymous with localism, the risks of ecotourism, and the cultivation of wild areas. They discuss the decoupling of energy use and progress, and point to OECD countries for examples of sustainable development. They explain the potential for science to do both good and harm, examine dark visions of planetary collapse, and describe more positive possibilities—alternative practices, including localization and degrowth. Finally, they examine the theoretical impact of new materialism, feminism, postcolonial criticism, animal studies, and queer ecology on the environmental humanities.

Shirinian, 2017-02-01 The final years of the Ottoman Empire were catastrophic ones for its non-Turkish, non-Muslim minorities. From 1913 to 1923, its rulers deported, killed, or otherwise persecuted staggering numbers of citizens in an attempt to preserve “Turkey for the Turks,” setting a modern precedent for how a regime can commit genocide in pursuit of political ends while largely escaping accountability. While this brutal history is most widely known in the case of the Armenian genocide, few appreciate the extent to which the Empire’s Assyrian and Greek subjects suffered and died under similar policies. This comprehensive volume is the first to broadly examine the genocides of the Armenians, Assyrians, and Greeks in comparative fashion, analyzing the similarities and differences among them and giving crucial context to present-day calls for recognition.
