The factors that weigh at every stage are here dissected, analysed and set within a historical narrative that spans more than five centuries. During that era, every aspect evolved and changed, as engagement with nature moved from a speculative pursuit heavily influenced by classical scholarship to a systematic science, drawing on advanced theory and technology. Far from being neutrally objective, the process of representing nature is shown as fraught with constraint and compromise. wonder by ed palacio: Whose Knowledge Counts in Government Literacy Policies?

Kenneth S. Goodman, Robert C. Calfee, Yetta M. Goodman, 2013-10-01 Accountability, in the form of standardized test scores, is built into many government literacy policies, with severe consequences for schools and districts that fail to meet ever-increasing performance levels. The key question this book addresses is whose knowledge is considered in framing government literacy policies? The intent is to raise awareness of the degree to which expertise is being ignored on a worldwide level and pseudo-science is becoming the basis for literacy policies and laws. The authors, all leading researchers from the U.S., U.K., Scotland, France, and Germany, have a wide range of views but share in common a deep concern about the lack of respect for knowledge among policy makers. Each author comes to the common subject of this volume from the vantage point of his or her major interests, ranging from an exposition of what should be the best knowledge utilized in an aspect of literacy education policy, to how political decisions are impacting literacy policy, to laying out the history of events in their own country. Collectively they offer a critical analysis of the condition of literacy education past and present and suggest alternative courses of action for the future.

wonder by ed palacio: Equity & Cultural Responsiveness in the Middle Grades Kathleen M. Brinegar, Lisa M. Harrison, Ellis Hurd, 2019-04-01 While developmental responsiveness is a deservedly key emphasis of middle grades education, this emphasis has often been to the detriment of focusing on the cultural needs of young adolescents. This Handbook volume explores research relating to equity and culturally responsive practices when working with young adolescents. Middle school philosophy largely centers on young adolescents as a collective group. This lack of focus has great implications for young adolescents of marginalized identities including but not limited to those with culturally and linguistically diverse backgrounds, LGBTQ youth, and those living in poverty. If middle level educators claim to advocate for young adolescents, we need to mainstream conversations about supporting all young adolescents of marginalized identities. It empowers researchers, educators, and even young adolescents to critically examine and understand the intersectionality of identities that historically influenced (and continue to affect) young adolescents and why educators might perceive marginalized youth in certain ways. It is for these reasons that researchers, teachers, and other key constituents involved in the education of young adolescents must devote themselves to the critical examination and understanding of the historical and current socio-cultural factors affecting all young adolescents. The chapters in this volume serve as a means to open an intentional and explicit space for providing a critical lens on early adolescence—a lens that understands that both developmental and cultural needs of young adolescents need to be emphasized to create a learning environment that supports every young adolescent learner.
