Soft Science Franny Choi: Exploring the Intersection of Poetry and Technology

soft science franny choi is more than just a phrase; it represents a powerful fusion of art, identity, and technology through the work of poet Franny Choi. Known for her innovative approach to poetry, Choi blends themes of race, gender, and artificial intelligence, creating a unique space where language and technology intersect. If you're curious about how contemporary poetry can engage with modern scientific concepts and digital culture, diving into Soft Science by Franny Choi offers fascinating insights.

Who is Franny Choi?

Before delving into Soft Science, it's helpful to understand the mind behind it. Franny Choi is an accomplished poet, performer, and writer whose work often challenges traditional boundaries. She identifies as a queer Korean-American, and her cultural background deeply informs her poetry. Choi's work frequently addresses issues of identity, systemic oppression, and the complexity of human relationships in a world increasingly shaped by technology.

Her debut collection, Soft Science, published in 2019, garnered critical acclaim for its inventive style and thematic depth. She combines speculative elements—like artificial intelligence and cyborg identities—with personal and political reflections, making her work resonate on multiple levels.

What is Soft Science?

At its core, Soft Science is a poetry collection that explores the intersections of humanity, technology, and emotion. The title itself is a clever nod to the categorization of sciences: "soft sciences" often refer to disciplines like psychology or sociology, which deal with human behavior and societal systems, contrasted with "hard sciences" such as physics or chemistry. In Choi's poetry, this concept is used metaphorically to explore how emotions and identities are "coded" and how technology influences human experience.

Themes in Soft Science

Soft Science tackles a variety of rich themes that invite readers to think deeply about contemporary life:

- **Artificial Intelligence and Cyborg Identity**: Choi imagines futures where AI and humans blend, questioning what it means to be human in a digital age.
- **Race and Marginalization**: Through her lens as a Korean-American poet, she highlights systemic injustices and the experience of otherness.
- **Gender and Queerness**: Choi's work challenges binary notions of gender and embraces fluidity, reflecting her queer identity.
- **Language and Communication**: The collection plays with linguistic structures, examining how language shapes identity and connection.
- **Emotional Complexity and Vulnerability**: Despite the technological motifs, the poems are deeply emotional and personal.

The Unique Style of Soft Science Franny Choi

One of the most striking features of *Soft Science* is Choi's innovative use of form and style. She employs a mix of traditional poetic devices with experimental digital and sci-fi elements, creating a hybrid form that mirrors the themes she explores.

Language as Code

Choi often uses language as if it were computer code, blending programming syntax with poetic imagery. This technique not only reflects the digital world but also symbolizes the "coding" of identity and society. Readers encounter poems that feel like algorithms or AI scripts, inviting them to rethink how language functions in a technologically saturated culture.

Dynamic Voice and Tone

The voice in *Soft Science* shifts between intimate and robotic, human and machine. This fluidity enhances the exploration of cyborg identities, blurring the line between organic and synthetic. Choi uses humor, irony, and pathos to create a nuanced emotional landscape that feels both futuristic and grounded.

Why Soft Science Matters in Contemporary Poetry

Soft Science by Franny Choi stands out not only for its artistic merit but also because it addresses urgent questions about technology and identity that are increasingly relevant today.

Bridging Art and Technology

In an era where AI and automation are reshaping society, Soft Science offers a poetic lens to understand these shifts. Instead of viewing technology as cold or alienating, Choi's work humanizes it, exploring how it intersects with culture, identity, and emotion.

Representation and Inclusivity

Choi's unapologetic focus on race, gender, and queerness enriches contemporary poetry, providing representation for marginalized voices. Her work challenges dominant narratives and encourages empathy and awareness.

Encouraging Critical Thinking

Reading Soft Science invites readers to question assumptions about identity, technology, and language. It encourages us to think critically about how we relate to machines and to each other in a digitized world.

How to Engage with Soft Science Franny Choi's Work

For those new to Franny Choi or curious about Soft Science, engaging with her poetry can be an enriching experience. Here are some tips to deepen your appreciation:

- **Read Slowly and Reflectively:** Choi's layered language benefits from careful reading. Pause to consider the metaphors and technological references.
- **Explore Audio Performances:** Listening to Choi perform her poems adds another dimension to understanding her tone and rhythm.
- **Research Background Themes:** Familiarize yourself with concepts like cyborg theory, AI in culture, and queer theory to grasp the deeper implications.
- **Join Discussions or Workshops:** Engaging with communities or classes focused on contemporary poetry can provide valuable perspectives.
- **Write Your Own Responses:** Try creating poetry or prose inspired by Soft Science's themes to explore your own relationship with technology and identity.

Franny Choi's Impact Beyond Soft Science

While *Soft Science* is a landmark work, Choi's influence extends beyond this collection. She is an active voice in spoken word poetry, often addressing social justice issues and the power of language. Her engagement with digital media and collaborations with artists across disciplines highlight her commitment to expanding the boundaries of poetry.

Choi also contributes to discussions about the future of literature in an age dominated by screens and algorithms, advocating for art that embraces technological change while preserving human complexity.

In a literary landscape that often separates science and art, *Soft Science* Franny Choi stands as a compelling example of how poetry can bridge these worlds with creativity and heart. Through her work, readers are invited to imagine new possibilities for identity, communication, and connection in the 21st century.

Frequently Asked Questions

Who is Franny Choi and what is her connection to 'soft science'?

Franny Choi is an acclaimed poet and writer known for exploring themes of identity, technology, and social justice. 'Soft science' refers to her work that blends poetic expression with scientific and technological concepts, creating an innovative literary approach.

What is the main theme of Franny Choi's 'Soft Science'?

The main theme of 'Soft Science' revolves around the intersection of technology, identity, and humanity, particularly focusing on issues of race, gender, and the impact of artificial intelligence on society.

Is 'Soft Science' a book or a poem by Franny Choi?

'Soft Science' is a poetry collection by Franny Choi that uses speculative and sci-fi elements to explore complex social and personal themes.

How does Franny Choi incorporate technology into her

poetry in 'Soft Science'?

Franny Choi incorporates technology into her poetry by using metaphors and imagery related to AI, robotics, and cybernetics to examine contemporary social issues and personal identity.

What inspired Franny Choi to write 'Soft Science'?

Franny Choi was inspired by the rapid advancements in technology and artificial intelligence, as well as her own experiences as a queer Asian American woman, to create a poetic exploration of how these forces shape human identity and society.

Has 'Soft Science' by Franny Choi received any awards or recognition?

Yes, 'Soft Science' has been widely praised for its innovative approach and has received recognition in literary circles for its contribution to contemporary poetry and speculative fiction.

Where can I read or purchase Franny Choi's 'Soft Science'?

Franny Choi's 'Soft Science' is available for purchase through major bookstores, online retailers like Amazon, and can also be found in many libraries and digital book platforms.

Soft Science Franny Choi: A Deep Dive into the Intersection of Poetry and Technology

soft science franny choi represents a compelling fusion of poetic innovation and technological inquiry, epitomized by the work of contemporary poet Franny Choi. Known for her experimental approach to language, identity, and digital culture, Choi's "Soft Science" project and its eponymous collection have garnered significant attention for their nuanced exploration of human-machine relationships and the evolving landscape of communication. This article offers an analytical perspective on soft science franny choi, situating it within broader conversations about technology's impact on art and identity, while unpacking the thematic and stylistic elements that define her work.

Understanding Soft Science in the Context of

Franny Choi's Work

At its core, "Soft Science" is a term that evokes the fluid and often subjective nature of disciplines such as sociology, psychology, and anthropology, which contrast with the empirical rigidity of "hard sciences." Franny Choi's appropriation of this phrase signals an engagement with the mutable boundaries between human experience and technological mediation. Her poetry interrogates how digital environments shape notions of selfhood, intimacy, and power, employing a language that oscillates between organic lyricism and mechanized syntax.

"Soft Science" as a collection extends beyond traditional poetic forms through its integration of multimedia elements and code-inspired structures, reflecting Choi's background in both creative writing and digital technology. This hybridization challenges readers to reconsider the capacity of poetry to reflect contemporary realities shaped by algorithms, artificial intelligence, and networked communication.

Thematic Exploration: Identity, Technology, and Language

A central theme in soft science franny choi is the mutable nature of identity within digital spaces. Choi's poetry often foregrounds marginalized identities, particularly those of Asian American and queer communities, situating them within a matrix of technological influence. The poems grapple with how digital platforms can both enable new forms of self-expression and perpetuate systems of surveillance and control.

Language itself emerges as a site of contestation and transformation. Choi experiments with syntax, code-switching, and neologisms, echoing the fragmented, nonlinear experience of digital communication. This linguistic playfulness underscores the tension between human vulnerability and technological precision, inviting reflection on how language evolves alongside soft sciences and digital innovation.

Stylistic Innovations and Multimedia Integration

Franny Choi's approach in soft science is marked by a deliberate subversion of conventional poetic aesthetics. The collection incorporates visual poetry, interactive elements, and digital media, blurring the boundaries between text and technology. This interdisciplinarity enhances the thematic concerns of the work, as form and content coalesce to simulate the hybrid nature of contemporary existence.

Her use of glitch aesthetics, fragmented lines, and code-like repetitions creates a rhythm that mimics the erratic flow of information online. The

poems often read as both literary texts and digital artifacts, embodying the “soft” interplay between human emotion and machine logic. This stylistic choice positions Choi’s work at the forefront of digital poetics, offering a blueprint for future explorations of technology-infused literature.

Soft Science Franny Choi in the Landscape of Contemporary Poetry

The emergence of soft science franny choi aligns with growing interest in how technology reshapes artistic production and reception. Compared to traditional poetry collections, Choi’s work is distinguished by its embrace of digital culture not merely as subject matter but as an integral component of poetic form. This approach contrasts with poets who engage technology descriptively, as Choi embodies it structurally and thematically.

In the broader scope of contemporary poetry, her work resonates with that of other experimental poets who incorporate technology and multimedia, such as Claudia Rankine and Natalie Diaz. However, Choi’s emphasis on identity politics and intersectionality infuses her digital poetics with urgent social commentary, making soft science a vital contribution to both literary and cultural discourse.

Pros and Cons of Choi’s Experimental Approach

- **Pros:**

- Innovative blending of poetry and technology expands the boundaries of the genre.
- Engages critically with contemporary social and political issues through a digital lens.
- Multimedia elements offer a dynamic, immersive reading experience.
- Challenges readers to rethink the relationship between human emotion and machine logic.

- **Cons:**

- Experimental forms may alienate readers accustomed to traditional poetry.
- Multimedia reliance can limit accessibility, especially in print or

non-digital formats.

- Complex language and coding references might require a steep learning curve for some audiences.

Impact and Reception of Soft Science Franny Choi

Since its release, soft science franny choi has been met with critical acclaim and scholarly interest. Reviews often highlight Choi's ability to harness the aesthetics of digital technology while maintaining a deeply humanistic perspective. Her work has been featured in prominent literary journals and digital platforms, signaling its relevance and resonance within both traditional and emerging literary spheres.

Moreover, the collection has sparked conversations about the future of poetry in an increasingly digitized world. Academics and critics have examined how Choi's integration of code and multimedia challenges existing paradigms of authorship, reader engagement, and textual permanence. This reception underscores the significance of soft science as a transformative force at the nexus of art and technology.

Soft Science Franny Choi: A Catalyst for Future Digital Poetics

Looking forward, the influence of soft science franny choi extends into the evolving domain of digital poetics and creative technology. By merging poetic craft with computational aesthetics, Choi opens avenues for artists to explore new narrative possibilities and modes of expression. Her work exemplifies how poetry can adapt and thrive in a world where the boundaries between human and machine are increasingly blurred.

As digital tools become more prevalent in literary production, the principles embodied in soft science—interactivity, hybridity, and critical engagement with technology—are likely to shape the trajectory of contemporary poetry. Franny Choi's pioneering efforts illuminate the potential for poetry to not only reflect but also interrogate and shape our technological futures.

In sum, soft science franny choi stands as a landmark in 21st-century poetry, merging the personal with the technological in a manner that is both intellectually rigorous and emotionally resonant. Through her innovative use of language, form, and multimedia, Choi invites readers to reconsider the soft sciences as a vital framework for understanding our digital age.

soft science franny choi: *Poetry Is Not a Luxury* Anonymous, 2025-05-06 From the creator of the beloved @PoetryIsNotaLuxury Instagram account, a gorgeously wrought poetry anthology that is a gift and a guide for readers through every season of life. Inspired by writer and philosopher Audre Lorde's famous claim: "Poetry is not a luxury," this anthology proves the vitality of poetry as a crucial source of inspiration, comfort, and delight. In a first section, "Summer," you'll find lush landscapes and love poems for weddings and anniversaries, alongside poems on travel, protest, and expressions of sheer joy and exhilaration. "Autumn" ushers in nostalgic poems about home and family and friendship, fall leaves, nesting and gratitude. You may turn to "Winter" should you require a poem for mourning, some lyrics for loneliness, or an ode to comfort. Rounding out a year's worth of verse is "Spring," in which you'll discover celebratory poems, in the form of praise for rain and flowers, new beginnings, and all that the future might hold. Each poem within has been chosen from centuries of verse from around the world, with an emphasis on living poets. Friends old and new await, with selections from Rita Dove, Victoria Chang, Ross Gay, Naomi Shihab Nye, C.D. Wright, Eileen Myles, Ada Limón, Ilya Kaminsky, Jos Charles, and more. From love poems to elegies, from the heights of new love to the furrows of anxiety, from special occasions to a morning pick-me-up, there is something here for longtime poetry lovers and novices, in any season of need.

soft science franny choi: *Transformed States* Martin Halliwell, 2024-11-15 Honourable Mention, British Association of American Studies Book Award *Transformed States* offers a timely history of the politics, ethics, medical applications, and cultural representations of the biotechnological revolution, from the Human Genome Project to the COVID-19 pandemic. In exploring the entanglements of mental and physical health in an age of biotechnology, it views the post-Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty-first century. The book draws on original research spanning the presidencies of George H. W. Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology. Some of these technologies reveal fierce ideological conflicts in the arenas of cloning, reproduction, artificial intelligence, longevity, gender affirmation, vaccination and environmental health. Interweaving politics and culture, the book illustrates how these health issues are reflected in and challenged by literary and cinematic texts, from *Oryx and Crake* to *Annihilation*, and from *Gattaca* to *Avatar*. By assessing the complex relationship between federal politics and the biomedical industry, *Transformed States* develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise. To that end, Martin Halliwell analyzes thirty years that radically transformed American science, medicine, and policy, positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested. Along with the two earlier books, *Therapeutic Revolutions* (2013) and *Voices of Mental Health* (2017), *Transformed States* is the final volume of a landmark cultural and intellectual history of mental health in the United States, journeying from the combat zones of World War II to the global emergency of COVID-19.

soft science franny choi: *The Routledge Handbook of CoFuturisms* Taryne Jade Taylor, Isiah Lavender III, Grace L. Dillon, Bodhisattva Chattopadhyay, 2023-10-30 The Routledge Handbook of CoFuturisms delivers a new, inclusive examination of science fiction, from close

analyses of single texts to large-scale movements, providing readers with decolonized models of the future, including print, media, race, gender and social justice. This comprehensive overview of the field explores representations of possible futures arising from non-Western cultures and ethnic histories that disrupt the “imperial gaze”. In four parts, *The Routledge Handbook of CoFuturisms* considers the look of futures from the margins, foregrounding the issues of Indigenous groups, racial, ethnic, religious, and sexual minorities, and any people whose stakes in the global order of envisioning futures are generally constrained due to the mechanics of our contemporary world. The book extends current discussions in the area, looking at cutting-edge developments in the discipline of science fiction and diverse futurisms as a whole. Offering a dynamic mix of approaches and expansive perspectives, this volume will appeal to academics and researchers seeking to orient their own interventions into broader contexts. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives (CC BY-NC-ND) 4.0 license.

soft science franny choi: *How to Make an Algorithm in the Microwave* Maya Salameh, 2022-10-14 In *How to Make an Algorithm in the Microwave*, winner of the 2022 Etel Adnan Poetry Prize, Maya Salameh explores the intimate relationships we have with our devices, speaking back to the algorithm that serves simultaneously as warden, data thief, and confidant--

soft science franny choi: *The Routledge Companion to Queer Literary Studies* Melissa E. Sanchez, 2025-02-28 Bringing together twenty-seven established and emerging scholars, *The Routledge Companion to Queer Literary Studies* discusses the historical development, current state, future directions, and political stakes of queer literary studies as a field of research and pedagogy. This innovative collection offers new frameworks for studying and teaching literature, art, film, music, theory, and philosophy from the medieval period to the twenty-first century. The contributors consider the structural implication of gender and sexuality with race, class, gender, ability, colonialism, capital, empire, ability, and relationships between human and non-human life and matter. *The Routledge Companion to Queer Literary Studies* is a vital resource for scholars, students, and teachers working across a range of historical periods, critical methods, and objects of study. It offers a multitude of approaches to queer literary studies, revealing the field to be as vital, and as contested, as ever.

soft science franny choi: *Techno-Orientalism 2.0* David S. Roh, Betsy Huang, Greta Aiyu Niu, Christopher T. Fan, Greta A. Niu, 2025-07-15 Building on the groundbreaking *Techno-Orientalism: Imagining Asia in Speculative Fiction, History, and Media*, published by Rutgers University Press in 2015, *Techno-Orientalism 2.0: New Intersections and Interventions* addresses the impact of a volatile post-pandemic present on speculative futures by and about Asians. The backdrop of this highly anticipated follow-up is a world that is radically different than in 2015: COVID-19, threats of a “new cold war” with China, Russia’s invasion of Ukraine, and the reemergence of “strong man” politics around the world. An essential volume for this new critical juncture in Asian American history, *Techno-Orientalism 2.0* catalogs intersectional dialogue with discourses such as Afrofuturism, Indigenous futurities, environmentalism, and disability studies. It also engages with recent high-profile and lesser-known works of Asian and Asian American speculative fiction, film, television, anime, art, music, journalism, architecture, state-sponsored policies and infrastructural projects, and the now-dominant China Panic.

soft science franny choi: *A Cyborg's Father* Dave Brennan, 2025-04-04 When his daughter was diagnosed with type 1 diabetes as an infant and became dependent on technology to stay alive, Dave Brennan set off in search of a vision: what does it mean to live as a cyborg? And how might he best help his daughter navigate the relationship between machine and flesh? Beginning with a line plucked from Donna Haraway’s “A Cyborg Manifesto” — “Their fathers, after all, are inessential” — *A Cyborg's Father* blends memoiristic poetic fragments with lyric essays that look toward music and literature by women artists who have embraced the technological as a metaphorical or literal means of investigating and owning their experience as women. Traversing the intersecting paths of feminism, chronic illness, disability studies, transhumanism, interdependence, and more, this is the

tale of a father whose greatest hope is to be rendered inessential.

soft science franny choi: Anger and Change in Korean American Literature Brian Willems, 2025-03-21 This book illustrates how Korean American novels and poetry use anger to enact change, foregrounding the various ways it can pinpoint injustice and suggest alternatives. Experiences of the forgotten Korean War, Korean military-mediated immigration to the US in the twentieth century, and the role of Korean Americans in some of the largest upheavals in American history all inform a specific relation to anger and both its expression and use in Korean American literature. Through various texts comprised of both poetry and prose from authors including Steph Cha, Cathy Park Hong, Eugene Lim, and Yongsoo Park, Willems highlights how anger is seen to function in some contexts as a positive fulcrum for change.

soft science franny choi: Black Bell Alison C. Rollins, 2024-04-23 Sweeping from the eighteenth century to futurist fabulations, *Black Bell* harmonizes poetry with performance art practices in an investigation of fugitivity. Inspired by the nineteenth century image of an enslaved woman wearing iron horns and bells, Alison C. Rollins's *Black Bell* continues an exploration of cataloging individual experience and collective memory. As Rollins sets out to resuscitate and embody the archive, we see a chorus of historical figures like Eliza Harris, Henry "Box" Brown, and Lear Green; readers can listen in as Phillis Wheatley takes a Turing test or venture through Dante's *Inferno* remixed with Wu-Tang Clan's *36 Chambers*. Poems travel across time and space, between the eighteenth century and futuristic fabulations, vibrating with fugitive frequencies, sounds of survival, and nerve-wracking notes tuned toward love and liberation. *Black Bell* navigates what it means to be both invisible and spectacle, hidden and on display, allowing lyric language to become the material for fashioning wearable sculptures akin to Nick Cave's "soundsuits." Integrating performance art practices, metalwork, and sonic, *Black Bell* becomes multimedia meditation on freedom seeking, furthering the possibilities of both the page and the canvas of the poet's body.

soft science franny choi: A Companion to American Poetry Mary McAleer Balkun, Jeffrey Gray, Paul Jaussen, 2022-04-11 *A COMPANION TO AMERICAN POETRY* A Companion to American Poetry brings together original essays by both established scholars and emerging critical voices to explore the latest topics and debates in American poetry and its study. Highlighting the diverse nature of poetic practice and scholarship, this comprehensive volume addresses a broad range of individual poets, movements, genres, and concepts from the seventeenth century to the present day. Organized thematically, the Companion's thirty-seven chapters address a variety of emerging trends in American poetry, providing historical context and new perspectives on topics such as poetics and identity, poetry and the arts, early and late experimentalisms, poetry and the transcendent, transnational poetics, poetry of engagement, poetry in cinema and popular music, Queer and Trans poetics, poetry and politics in the 21st century, and African American, Asian American, Latinx, and Indigenous poetries. Both a nuanced survey of American poetry and a catalyst for future scholarship, *A Companion to American Poetry* is essential reading for advanced undergraduate and graduate students, academic researchers and scholars, and general readers with interest in current trends in American poetry.

soft science franny choi: Whiteness, Feminism and the Absurd in Contemporary British and US Poetry Jenna Clarke, 2025-02-28 In an era of political and social turmoil on both sides of the Atlantic, where issues of gender, race and class are linked with concerns of how to survive in a capitalist society, a new aesthetic of Absurdist poetry has emerged. This aesthetic has a troubled relationship to race, pervaded by issues of representation in avant-garde poetry, and notions of who poetry writers and readers are. Focusing on British and US poets including Rachael Allen, Emily Berry, Crispin Best, Caroline Bird, Franny Choi, Jennifer L. Knox, Morgan Parker and Jane Yeh, Jenna Clarke investigates how poets use the Absurd to destabilise ideas about race, gender and class and imagine social change. Bringing together Whiteness studies, socio-political theory, and close readings of poems, Clarke examines how the Absurd has developed, how its poets understand privilege and offer prospects of hope and change, and how the Absurd might move away from nihilism.

soft science franny choi: The Cambridge Companion to American Poetry and Politics since 1900 Daniel Morris, 2023-04-27 The Cambridge Companion to Twentieth Century American Poetry and Politics shows how American poets have addressed political phenomena since 1900. This book helps students, teachers, and general readers make sense of the scope and complexity of the relationships between poetry and politics. Offering detailed case studies, this book discusses the relationships between poetry and social views found in work by well-established authors such as Wallace Stevens, Langston Hughes, and Gwendolyn Brooks, as well as lesser known, but influential figures such as Muriel Rukeyser. This book also emphasizes the crucial role contemporary African-American poets such as Claudia Rankine and leading spoken word poets play in documenting political themes in our current moment. Individual chapters focus on specific political issues - race, institutions, propaganda, incarceration, immigration, environment, war, public monuments, history, technology - in a memorable and teachable way for poetry students and teachers.

soft science franny choi: Experimental Writing Lawrence Lenhart, Will Cordeiro, 2024-02-22 An inspiring guide to the practices of contemporary experimental creative writing, this book explores experimentation within both traditional writing genres and 'post-genre' modes such as hybrid texts, Non-creative writing, textual materiality, creative re-purposing, performance and new media technologies. Combining the practices, history, social context, and philosophical backgrounds of experimental work with a broad anthology of models in-book and online, Experimental Writing gives you the toolkit of techniques and skills to confidently engage with forms previously perceived as intimidating so that you can reinvigorate your craft. In addition, the book includes sections on new approaches to the workshop model, emphasis on community and collaboration, and institutional critique. These chapters will provide you with a "big picture" perspective and the motivation to question the templates you work within, giving you the where-with-all to shape your own ideals for writing, no matter what their stylistic choices. Within its broad scope, Experimental Writing covers: - a comprehensive survey of relevant movements, texts, authors, and techniques of non-traditional forms - a survey of evolving trends with exemplars of how genres can be disrupted to help you appreciate experimental styles - demonstrations of how more diverse and innovative pedagogical interventions have the potential to inspire your creativity and create more original work - an examination of the institutional forces that have shaped the creative writing landscape you inhabit, to prompt you to re-examine the pressures, cultural biases, and power structures that have shaped both your aesthetic vision and potential future career paths - frameworks for independent research, practitioner interviews, and motivating questions to get you thinking and questioning before you encounter each new topic With each chapter accompanied by stimulating pedagogical features such as a timeline of experimental writing, free writes, games and constraints, reflections, exercises, prompts and case studies throughout, this invaluable text reveals wider horizon for your artistic endeavors and will activate your critical thinking about a range of issues and ideas. Additional online resources for this book can be found at

<http://www.bloomsburyonlineresources.com/experimental-writing-a-writers-guide-and-anthology>.

soft science franny choi: Spot Weather Forecast Kevin Goodan, 2021-11-09 From the unique perspective of a U.S. Forest Service elite, a Type 1 Interagency "Hotshot" Crew (the "SEAL Team Six of the firefighting world"), poems weave together memory, urgency, and the passage of time. Features segments from actual incident reports, forcing readers to witness what it's like to stand before an inferno, walking with one foot in the black.

soft science franny choi: I Am the Most Dangerous Thing Candace Williams, 2023-05-10 Over the course of these poems, the Black, queer protagonist begins to erase violent structures and fill the white spaces with her hard-won wisdom and love. I am the Most Dangerous Thing doesn't just use poetry to comment on life and history. The book is a comment on writing itself. What have words done? When does writing become a form of disengagement, or worse, violence? The book is an exercise in paring the state down to its true logic of violence and imagining what can happen next. There are many contradictions—Although the protagonist teaches the same science that was used to justify enslavement and a racial caste system, she knows she will die at the hands of science and

denies the state the last word by penning her own death certificate. As an educator and knowledge worker, she is an overseer of the same racist, misogynistic, and homophobic systems that terrorize her. Yet, she musters the courage to kill Kurtz, a primordial vision of white terror. She is Black and queer and fat and angry and chill and witty and joyful and depressed and lovely and flawed and an (im)perfect dagger to the heart of white supremacist capitalism.

soft science franny choi: Bibliophile: Diverse Spines Jane Mount, Jamise Harper, 2021-10-18 It's time to diversify your reading list. This richly illustrated and vastly inclusive collection uplifts the works of authors who are often underrepresented in the literary world. Using their keen knowledge and deep love for all things literary, coauthors Jamise Harper (founder of the Diverse Spines book community) and Jane Mount (author of *Bibliophile*) collaborated to create an essential volume filled with treasures for every reader: • Dozens of themed illustrated book stacks—like Classics, Contemporary Fiction, Mysteries, Cookbooks, and more—all with an emphasis on authors of color and own voices • A look inside beloved bookstores owned by Black, Indigenous, and People of Color • Reading recommendations from leading BIPOC literary influencers Diversify your reading list to expand your world and shift your perspective. Kickstart your next literary adventure now! EASY TO GIFT: This portable guide is packed with more than 150 colorful illustrations is a perfect gift for any booklover. The textured paper cover, gold foil, and ribbon marker make this book a special gift or self-purchase. DISCOVER UNSUNG LITERARY HEROES: The authors dive deep into a wide variety of genres, such as Contemporary Fiction, Classics, Young Adult, Sci-Fi, and more to bring the works of authors of color to the fore. ENDLESS READING INSPIRATION: Themed book stacks and reading suggestions from luminaries of the literary world provide curated book recommendations. Your to-read list will thank you. Perfect for: bookish people; literary lovers; book club members; Mother's Day shoppers; stocking stuffers; followers of #DiverseSpines; Jane Mount and Ideal Bookshelf fans; Reese's Book Club and Oprah's Book Club followers; people who use Goodreads.com; readers wanting to expand/decolonize their book collections; people interested in uplifting BIPOC voices; antiracist activists and educators; grads and students; librarians and library patrons wanting to expand/decolonize their book collections; people interested in uplifting BIPOC voices; antiracist activists and educators; grads and students; librarians and library patrons

soft science franny choi: We Borrowed Gentleness J. Estanislao Lopez, 2022-10-09 *We Borrowed Gentleness* interrogates the innateness of pain and forms of destruction—through natural disaster, through God, through family, and through the power structures and patriarchal violence that embeds itself in language and cultural memory. Poems critique and challenge the patriarchal narratives that dominate American history. The poems leave the question open of whether man, men, a father and son, are redeemable after the surge of rising white nationalism in America. And yet, there are poems that find, still, bits of joy and perhaps a shred of hope. By juxtaposing poems of louder narrative imagination with quieter poems that explore intimate failings within a family, often portrayed with a realist aesthetic, the book attempts to work through the essential fault in man, in men—in the structures that they design and maintain.

soft science franny choi: Brother Sleep Aldo Amparán, 2022-09-14 *Brother Sleep* is a collection of grievances through which a speaker mourns the loss of a brother, grandfather, and a sense of self as they navigate a landscape of desire marred by violence against queer and Mexican people. Set in the border cities of El Paso, TX, and Ciudad Juarez, Mexico, these poems navigate the liminal space between language and silence. As the poems grieve the loss of family, the violence perpetrated against queerness, the bodies lost border-side, and the cruelty against tenderness, Amparan's words bloom in evocation. Reflecting on lovers, friends, family, classmates, and others of impact, they navigate personal reconciliation in response to imposed definitions of their personhood. These poems evoke an equal sense of sorrow and tenderness amidst a complex landscape of the self.

soft science franny choi: Museum of Objects Burned by the Souls in Purgatory Jeffrey Thomson, 2022-05-11 Titled after a small gallery of the same name found in Rome, the poems are devoted to meditations on religious relics and works of art. They explore the narrative power these

objects carry—the way we imbue totemic figures with both meaning and story, and the potential they have to define the world.
