her majesty queen rania al abduallah: 2009 Andrea Bonomi, Paul Volken, 2010-12-23 The current rich volume of the Yearbook attempts to strike a balance in the multifaceted expressions of the increasing importance of private international law at national and supranational levels. The vitality of private international law within the European Union is evidenced by both legislative projects and the rich case law of the European Court of Justice. While the European Commission's draft for a Regulation on succession - which probably constitutes the most detailed and ambitious attempt ever to codify PIL in this area - begins its legislative process, a new initiative on the application of foreign law is being considered by the European institutions. Both of these developments are discussed in the Doctrine section. But the newest Yearbook of PIL also examines interesting developments taking place on other continents. For example, the present volume includes a special section focusing on Chinese PIL and reports on the renewed interest with conflict of laws in the U.S. doctrine.

her majesty queen rania al abduallah: Cambodia Pou Sothirak, 2003-08-01 In the 20 years since the Paris accords of 1991 brought peace to Cambodia, the country has undergone what can only be described as astounding change. From a polity where the entire fabric of society had been rent asunder through years of war and genocide, contemporary Cambodia is fast becoming a vibrant state and assuming a new position in the Asia-Pacific region. The contributions to this volume - many by prominent figures who were intimately connected with the process - describe the diverse strands of mediation and peace-building which went into the creation of the 1991 accords. The subsequent role of UNTAC and the 1993 general elections in the process of Cambodian revival and social rebuilding are also described. While not denying that obstacles and difficulties remain, the contributions outline the evolving economic, political, religious and human resource situations within Cambodia, while also examining the country's contemporary international relations. This book

constitutes a particularly fitting testament to the 20 years of Cambodian reconstruction which have followed the 1991 peace accords.

her majesty queen rania al abdullah: *Out of the Ashes* Koen Feyter, 2005 Over the last decade, the issue of reparation for victims of gross and systematic human rights violations has given rise to intense debates at the national and the international level. Discussions particularly arise in post-conflict situations characterised by serious violations of human rights, such as genocide, crimes against humanity, war crimes, and other forms of injustice of the past. Crucial questions include: what harm inflicted to victims warrants reparation? when and how to repair the harm? who is eligible for reparation and who has the duty to repair? These and other questions raise many challenging issues for theory and practice. This volume contains the contributions presented at an international conference in Brussels, in February 2005, on the right to reparation for victims of serious human rights violations. It also includes the final report of a research project undertaken jointly at the Universities of Antwerp (UA) and Leuven (K.U.Leuven) between 2000 and 2004 on the right to reparation in international law for victims of gross and systematic human rights violations, both from a legal and a socio-political perspective. The present volume is aimed at academics, policy-makers, national and international courts and tribunals, the legal professions, and civil society at large.

her majesty queen rania al abdullah: *Globalization and Health* Ichirō Kawachi, Sarah P. Wamala, 2007 Globalization is breaking down economic, political, cultural, demographic, and social barriers across the world at an astonishing pace. The topic of globalization can arouse passionate debate in many circles including academic journals, the popular media, and even on the streets. This new world order is marked by new actors, new rules of governance, new forms of communication, and the global movement of populations. Health is an exquisitely sensitive mirror of social conditions, and the authors of this book argue that the assessment of health is an important criterion for evaluating and monitoring the progress of globalization. This book provides an analysis of the most serious global threats to health, the tools that can be used to evaluate them, and the international agencies established to respond to them. Medical threats such as infectious diseases, obesity, tobacco use, and global climate change are discussed, but the authors also expand their scope to include socio-political health impacts such as economic inequality. The complex role of organizations such as the World Health Organization, the International Monetary Fund, and the World Bank is also analyzed, as is the increasing interconnectedness of health and non-health actors. Is this blurring of boundaries really beneficial to the public's health, or have these actors abandoned health issues for power politics? By drawing together an international group of health experts, *Globalization and Health* provides a comprehensive account of the successes and failures, as well as the challenges and opportunities of globalization for public health.

her majesty queen rania al abdullah: *Child Soldiers* Dr. U C Jha, 2018-01-01 As many as fifty non-state armed groups (NSAGs) in countries such as Afghanistan, Colombia, the Democratic

Republic of Congo, India, Iraq, Israel, Palestine, Libya, Mali, Pakistan, the Philippines, Somalia, South Sudan, Syria, Thailand and Yemen are engaged in the recruitment and use of children in armed conflict. In Somalia, South Sudan, Syria and Yemen the situation continues to be perilous, with many hundreds of children recruited, used, killed and maimed. Children have been used by the NSAGs as executioners and suicide bombers. By an estimate, there are 300,000-350,000 child soldiers worldwide and the alarming trend continues to grow. According to the United Nations, there has been a fivefold increase in the number of children recruited in a few ongoing armed conflicts. This book gives an up-to-date and comprehensive analysis of the recruitment and use of child soldiers worldwide; and examines the (in) adequacy of international institutions and laws in protecting children. It is an invaluable resource for anyone interested or working in the field of protecting children: teachers, students, lawyers, government officials, military and police personnel, researchers and human rights activists.

her majesty queen rania al abduallah: The Reparation System of the International Criminal Court Eva Dwertmann, 2010-03-02 When the Rome Statute for the International Criminal Court was adopted in 1998, one of its great innovations was that victims were granted an active role in the proceedings. In its early jurisprudence on victims' rights, the International Criminal Court stated that "the success of the Court is, to some extent, linked to the success of its reparation system." This book is among the first to focus on the International Criminal Court's power to order reparations to victims. It provides a comprehensive analysis of the legal framework of the reparation system, taking into account relevant Court decisions. Possibilities for its implementation are drawn up, providing potential solutions for its multiple challenges, including the distinct asymmetry between the individualized responsibility to provide reparations and the collective nature of the crimes and its consequences. With its practical approach, this book is particularly valuable for practitioners, but also for students and researchers.
