love divine all loves excelling sheet music: Wonder Reborn Thomas Troeger, 2010-07-27 This book explores an issue at the nerve of the long term health of all churches: how godly wonder can be reborn through renewed attention to the place of beauty in preaching and worship. The book opens with an exploration of the theological and cultural difficulties of defining beauty. It traces the church's historical ambivalence about beauty and art and describes how, in our own day, the concept of beauty has been commercialized and degraded. Troeger develops a theologically

informed aesthetic that provides a counter-cultural vision of beauty flowing from the love of God. The book demonstrates how preachers can reclaim the place of beauty in preaching and worship. Chapter two employs the concept of midrash to mine the history of congregational song as a resource for sermons. Chapter three introduces methods from musicology for creating sermons on instrumental and choral works and for integrating word and music more effectively. Chapter four explores how the close relationship between poetry and prayer can stir the homiletical imagination. Each of these chapters includes a selection of the author's sermons illustrating how preachers can use these varied art forms to open a congregation to the beauty of God. A final chapter recounts the responses of congregation members to whom the sermons were delivered. It uses the insights gained from those experiences to affirm how the human heart hungers for a vision of wonder and beauty that empowers people to live more faithfully in the world.

love divine all loves excelling sheet music: The Oxford Handbook of Music and World Christianities Suzel Ana Reily, Jonathan M. Dueck, 2016-03-25 The Oxford Handbook of Music and World Christianities investigates music's role in everyday practice and social history across the diversity of Christian religions and practices around the globe. The volume explores Christian communities in the Americas, Europe, Africa, Asia, and Australia as sites of transmission, transformation, and creation of deeply diverse musical traditions. The book's contributors, while mostly rooted in ethnomusicology, examine Christianities and their musics in methodologically diverse ways, engaging with musical sound and structure, musical and social history, and ethnography of music and musical performance. These broad materials explore five themes: music and missions, music and religious utopias (and other oppositional religious communities), music and conflict, music and transnational flows, and music and everyday life. The volume as a whole, then, approaches Christian groups and their musics as diverse and powerful windows into the way in which music, religious ideas, capital, and power circulate (and change) between places, now and historically. It also tries to take account of the religious self-understandings of these groups, presenting Christian musical practice and exchange as encompassing and negotiating deeply felt and deeply rooted moral and cultural values. Given that the centerpiece of the volume is Christian religious musical practice, the volume reveals the active role music plays in maintaining and changing religious, moral, and cultural values in a long history of intercultural and transnational encounters.
