Couch to 50k Training Plan: Your Ultimate Guide to Going the Distance

couch to 50k training plan is an exciting and achievable journey for many runners who want to push beyond the typical marathon distance. Moving from little to no running experience to completing a 50-kilometer race — roughly 31 miles — might seem daunting at first, but with the right strategy, dedication, and mindset, it's absolutely within reach. Whether you're an absolute beginner or someone looking to extend your endurance, a well-structured training plan tailored for the 50k distance can help you cross that finish line feeling strong and accomplished.

In this article, we'll break down what a couch to 50k training plan entails, why it's important to build gradually, how to incorporate cross-training and recovery, and tips on nutrition and gear to support your long-distance adventure.

Understanding the Couch to 50k Training Plan

When people hear "couch to 50k," they often think of starting from zero fitness and leaping straight to ultra-distance running. However, a successful couch to 50k training plan is thoughtfully designed to gradually build endurance, strength, and mental toughness. The goal is to transform a sedentary lifestyle into one capable of handling over 30 miles of running or trail running, usually over several months.

Why Choose a 50k Distance?

The 50k is a popular ultra-distance race that provides a natural next step beyond the marathon. It offers a manageable challenge for newcomers to ultras, often taking between 4 to 8 hours to complete, depending on terrain and fitness. Many runners find the 50k distance rewarding because it combines the mental challenge of endurance with the thrill of exploring new trails or courses.

The Core Principles of a Couch to 50k Plan

A couch to 50k training plan rests on several key principles:

- **Gradual progression:** Increasing weekly mileage and long run distances slowly to avoid injury.
- **Consistency:** Regular workouts and runs are critical for building fitness.
- **Rest and recovery:** Scheduled rest days and easy runs to allow muscles to repair.
- **Cross-training:** Activities like cycling, swimming, or strength training to improve overall fitness without overloading running muscles.
- **Nutrition and hydration:** Fueling your body properly before, during, and after runs.

- **Mental preparation:** Developing focus and resilience to handle the demands of ultra-distance running.

Building Your Training Schedule

Transitioning from a sedentary lifestyle to tackling a 50k needs a clear, adaptable plan. Most couch to 50k plans span anywhere from 20 to 30 weeks, depending on your starting fitness level.

Weeks 1-8: Establishing a Running Base

Starting with run/walk intervals is a great way to minimize injury risk and build cardiovascular endurance. Many beginners start with short sessions, such as 20-30 minutes, three to four times a week. Gradually increase the time spent running relative to walking over these weeks.

During this phase:

- Aim to run at an easy, conversational pace.
- Focus on form and breathing.
- Include one longer run each week, starting at 3-4 miles and increasing slowly.

Weeks 9-16: Increasing Mileage and Endurance

Once you've built a solid base, it's time to increase your weekly mileage and long run distances. Long runs are the foundation of ultra training because they simulate the endurance demands of the race.

Tips for this phase:

- Add about 10% more distance weekly, but listen to your body.
- Incorporate back-to-back long runs on weekends to simulate fatigue.
- Start adding some gentle hill work or trail running if your race is off-road.
- Maintain easy runs and recovery days to balance the workload.

Weeks 17-24: Sharpening and Race Prep

As race day draws near, you'll want to fine-tune your endurance and practice race-day strategies.

Consider:

- Including some tempo runs or intervals to improve speed.

- Testing your nutrition and hydration during long runs.
- Practicing your gear setup — shoes, hydration packs, clothing.
- Tapering properly in the last two weeks, reducing mileage to let your body recover fully before the race.

Incorporating Cross-Training and Strength Work

Running alone isn't enough to prepare you for a 50k. Supporting muscles and overall fitness are crucial.

Benefits of Cross-Training

Cross-training activities such as swimming, cycling, or elliptical workouts can:

- Improve cardiovascular fitness without the impact stress of running.
- Aid recovery by promoting blood flow.
- Help balance muscle groups and reduce injury risk.

Aim for 1-2 cross-training sessions per week, especially on easy days or rest days.

Strength Training for Runners

Adding strength workouts focusing on the core, hips, glutes, and legs can enhance running economy and endurance.

Key exercises include:

- Squats and lunges for leg strength.
- Planks and bridges for core stability.
- Single-leg exercises to improve balance.

Perform strength training 2-3 times per week, using bodyweight or light weights initially.

Nutrition and Hydration Strategies

Long-distance running places significant demands on your energy systems, making nutrition and hydration vital components of your training plan.

Fueling Your Runs

During training, experiment with different types of fuel — gels, bars, fruit, or electrolyte

drinks — to see what your stomach tolerates best during long runs. Ideally, aim for 30-60 grams of carbohydrates per hour during exercise lasting over an hour.

Hydration Tips

Hydration needs vary depending on weather, sweat rate, and intensity. Carry water or electrolyte drinks during longer sessions, and consider using hydration packs or belts if necessary. Practice your hydration strategy during training to avoid surprises on race day.

Daily Nutrition for Recovery

Eating a balanced diet rich in carbohydrates, proteins, fats, vitamins, and minerals supports recovery and performance. Protein intake post-run helps muscle repair, while carbohydrates replenish glycogen stores.

Gear and Equipment Essentials

Investing in the right gear can make your couch to 50k journey more comfortable and enjoyable.

Shoes

Choose running shoes suited to your foot type and training terrain. If your 50k is on trails, trail running shoes with good grip and protection are advisable.

Clothing

Opt for moisture-wicking, breathable fabrics to prevent chafing and overheating. Layer according to weather conditions.

Accessories

- Hydration packs or belts
- GPS watch or app for tracking distance and pace
- Headlamp if running in low light
- Socks designed to reduce blisters

Staying Motivated and Overcoming Challenges

Training for a 50k is as much a mental challenge as a physical one. Staying motivated over months of preparation can be tricky, but here are some ideas to keep you on track:

- Set small, achievable goals along the way.
- Join a running group or find a training buddy.
- Mix up routes and surfaces to keep runs interesting.
- Celebrate milestones, such as your first 10k, half marathon, or longest run.
- Listen to your body and don't be afraid to rest when needed.

Many runners find that the sense of accomplishment and the supportive community around ultra running provide powerful motivation to keep moving forward.

Embarking on a couch to 50k training plan is an incredible way to transform your fitness and mindset. With patience, consistency, and smart training, you'll not only prepare your body for the challenge but also discover new levels of strength and resilience along the way. The journey itself becomes as rewarding as crossing the finish line.

Frequently Asked Questions

What is a Couch to 50K training plan?

A Couch to 50K training plan is a structured running program designed to help beginners gradually build endurance and strength to complete a 50-kilometer ultramarathon, starting from little or no running experience.

How long does it typically take to complete a Couch to 50K training plan?

Most Couch to 50K training plans range from 20 to 30 weeks, depending on the individual's fitness level and running experience, allowing gradual progression to avoid injury and build stamina.

What are the key components of a Couch to 50K training plan?

Key components include gradual mileage increases, a mix of easy runs, long runs, rest days, cross-training, strength training, and proper nutrition and hydration strategies.

Can beginners with no running experience follow a Couch to 50K training plan?

Yes, many Couch to 50K plans are designed specifically for beginners, starting with walking and run/walk intervals and gradually increasing running distance and intensity.

over time.

How important are rest days in a Couch to 50K training plan?

Rest days are crucial as they allow the body to recover, reduce risk of injury, and improve overall performance; most plans include at least one or two rest days per week.

Should I include strength training in my Couch to 50K training plan?

Yes, incorporating strength training helps improve muscle endurance, balance, and reduces injury risk, making it an important part of a comprehensive 50K training program.

How do I prevent injury while following a Couch to 50K training plan?

To prevent injury, follow a gradual mileage increase, listen to your body, incorporate rest and recovery days, use proper running shoes, and include strength and flexibility exercises in your routine.

Couch to 50K Training Plan: A Comprehensive Guide to Transitioning from Beginner to Ultramarathon Runner

couch to 50k training plan represents an increasingly popular approach for runners aiming to bridge the gap between casual fitness levels and ultramarathon distances. Designed to take individuals from little or no running experience to completing a 50-kilometer race, these plans emphasize gradual progression, injury prevention, and sustainable endurance development. As ultrarunning gains traction worldwide, understanding the nuances of a couch to 50k training plan becomes essential for athletes seeking to conquer this challenging distance safely and effectively.

Understanding the Couch to 50K Training Plan Concept

The couch to 50k training plan is an evolution of the classic couch to 5k programs that have successfully introduced millions to running. While couch to 5k focuses on short-distance running and basic endurance, the 50k variant extends the timeline and complexity to prepare runners for ultramarathon distances, which typically exceed 31 miles. This training approach is characterized by incremental increases in weekly mileage, cross-training, strategic rest days, and nutrition guidance.

Unlike traditional marathon training plans, which often target 26.2 miles, the 50k distance demands a different physiological and mental preparation. It involves adapting to longer time on feet, terrain variability, and energy management. Therefore, couch to 50k plans incorporate specific elements such as back-to-back long runs, trail running, and mental resilience exercises.

Key Components of a Successful Couch to 50K Training Plan

Effective couch to 50k training plans share several foundational components that ensure gradual adaptation and minimize injury risk:

- **Progressive Mileage Build-Up:** Starting with manageable distances and systematically increasing weekly mileage by 10-15% to avoid overuse injuries.
- **Incorporation of Walk-Run Intervals:** Especially important for beginners to build aerobic capacity without excessive strain.
- **Cross-Training and Strength Workouts:** Activities such as cycling, swimming, or gym sessions help improve overall fitness and muscular balance.
- **Rest and Recovery:** Scheduled rest days and active recovery sessions are crucial to allow the body to repair and strengthen.
- **Nutrition and Hydration Strategies:** Training the body to efficiently use carbohydrates, fats, and electrolytes during extended efforts.
- **Mental Conditioning:** Techniques such as visualization and goal setting to prepare for the psychological demands of ultra-distance running.

Analyzing Popular Couch to 50K Training Plans

Several training plans are available online and through coaching services, each with unique methodologies and target audiences. An analytical look at some prominent plans reveals differences in duration, intensity, and support resources.

The 24-Week Progressive Plan

One of the most common couch to 50k plans spans approximately 24 weeks, balancing gradual mileage increase with consistent rest. This approach suits runners who have minimal base fitness but can commit to 4-5 training days weekly. The plan typically starts with walk-run sessions, transitions to steady-state runs, and culminates in back-to-back

long runs mimicking race conditions.

Advantages include a sustainable progression curve and built-in flexibility. However, it requires patience and discipline, as rapid gains are unlikely in the early stages.

The 16-Week Accelerated Plan

For those with some running background or previous race experience, a condensed 16-week couch to 50k plan offers a more intensive schedule. This plan demands higher weekly mileage early on and integrates interval training and speed work to improve cardiovascular efficiency.

While time-efficient, the accelerated plan presents a higher injury risk if not carefully managed. Adequate warm-up routines and attentive listening to the body are essential.

Customized Coaching and App-Based Plans

Modern technology has introduced app-based coaching platforms that tailor couch to 50k training plans to individual progress and feedback. These dynamic plans adjust workouts based on performance metrics, fatigue levels, and user input, providing a personalized experience.

Such platforms often include community support, pacing tools, and nutrition guidance, making them attractive for novice ultrarunners seeking comprehensive assistance.

Challenges and Considerations in Couch to 50K Training

Transitioning from sedentary to ultramarathon-ready is fraught with challenges. Understanding these obstacles equips runners to mitigate setbacks.

Injury Prevention and Management

The most common issues during couch to 50k training are overuse injuries such as shin splints, plantar fasciitis, and IT band syndrome. Gradual progression and strength training are fundamental to prevention. Monitoring pain and differentiating it from normal training discomfort is critical.

Balancing Life Commitments

Ultramarathon training demands significant time investment. Balancing work, family, and social life with long training runs can be stressful. Time management and realistic goal setting are vital to maintain motivation without burnout.

Psychological Resilience

Enduring hours of continuous running requires mental toughness. Training plans that incorporate mental conditioning techniques, such as mindfulness and positive self-talk, can enhance race-day performance and enjoyment.

Nutrition and Hydration Strategies for 50K Training

Nutrition plays a pivotal role in the success of a couch to 50k training plan. Runners must learn to fuel adequately before, during, and after workouts to optimize recovery and performance.

Key nutritional considerations include:

- **Carbohydrate Loading:** Ensures glycogen stores are maximized before long runs.
- **Electrolyte Balance:** Critical for maintaining muscle function and preventing cramps during extended efforts.
- **Hydration:** Drinking according to thirst and environmental conditions to avoid dehydration or hyponatremia.
- **Energy Gels and Snacks:** Training the gut to tolerate in-race nutrition minimizes gastrointestinal distress on race day.

Incorporating these strategies within the training plan enhances physiological adaptation and reduces the likelihood of bonking or hitting the proverbial wall.

Technology and Tools to Support Couch to 50K Training

Modern runners benefit from various technological tools that complement couch to 50k training plans:

- **GPS Watches:** Track distance, pace, and elevation, enabling informed adjustments

to training loads.

- **Heart Rate Monitors:** Help maintain training intensity within optimal aerobic zones.
- **Running Apps:** Provide structured workouts, progress tracking, and community engagement.
- **Foam Rollers and Recovery Devices:** Aid in muscle recovery and injury prevention post-training.

Integration of these tools facilitates a data-driven approach, making training more efficient and personalized.

Final Thoughts on Embracing a Couch to 50K Journey

The path from a sedentary lifestyle to completing a 50k event is undoubtedly challenging but achievable with a well-structured couch to 50k training plan. Success hinges on consistency, patience, and adaptability. By carefully analyzing various plans, balancing physical and mental preparation, and leveraging modern training tools, aspiring ultrarunners can embark on this transformative journey with confidence.

The increasing availability of tailored plans and supportive communities continues to lower barriers for newcomers, making the dream of crossing the 50k finish line accessible to a broader population than ever before.

And if you want to explore new trails, you can use the navigation and route planning section to create your own exciting off-road adventure. If you're a trail runner or would like to become one, this book is your new best friend.

couch to 50k training plan: Coach I didn't run because... Dean Hebert, 2017-01-30 Get over your excuses now! This is the second edition of this seriously lighthearted look at making excuses not to run. Of course these excuses - hundreds to choose from - are not just about running. They reflect personal choice in every sphere of life. It is packed with real and not-so-real excuses. But, as you will learn, what is an excuse for one person is just a speed bump to navigate to another. Better yet, it gives real life examples of people who found ways not to give into excuses - real life Excuse Busters. The more you have struggled with making excuses for not reaching your goals the more you need this book. It details 12 surefire excuse busting techniques from the mental game expert and coach to elite, professional and Olympic level athletes - Coach Dean Hebert.

couch to 50k training plan: **The Born Again Runner** Pete Magill, 2016-10-09 Pete Magill's *The Born Again Runner* is a one-of-a-kind guide for everyone who wants to run but feels they can't. As a drug-addled young man, Pete Magill once found himself in the ER, with his body telling him to give up. Taking up running seemed impossible—but he willed himself to do it anyway. Magill went on to become one of the fastest masters runners ever, a multi-USA Masters Cross Country Runner of the Year, and a sought-after coach. Over a glowing (albeit hard-won) career, he has heard every excuse people use to stop running or never start—from achy knees and sore ankles, to advanced age and arthritis, to too many cigarettes or years on the couch. In every case, Magill's best advice is to do what he did: Run anyway—at a pace and mileage that work. Through inspiration, science, and anecdote, Magill gets runners out the door; through personal action plans, he sets them on the right path; and through the best exercises to protect and rehabilitate the body, he keeps them going—showing a way forward for new and sidelined runners who haven't before realized how close they are to fun and pain-free running! "Whether you're just starting out as a runner or starting afresh, you can do no better than heed the guidance of running's ultimate comeback kid, Pete Magill, as presented in *The Born Again Runner*." —Matt Fitzgerald, award-winning co-author of *Pain & Performance* "Myths are busted and excuses are denied. . . . It will be pretty difficult to deny Magill, so just get out there, start, and stay with your running regime." —Portland Book Review

couch to 50k training plan: **Hal Koerner's Field Guide to Ultrarunning** Hal Koerner, 2014-08-01 Ultramarathons don't leave much room for mistakes. Don't learn the hard way: get a jump on training for an ultramarathon with Hal Koerner's *Field Guide to Ultrarunning*, a comprehensive handbook to running 30 to 100 miles and beyond, written by one of the most experienced and recognized athletes in the sport. Hal Koerner is among America's best ultrarunners with podium results in more than 90 ultramarathons. In his smart, down-to-earth handbook, Koerner shares hard-earned wisdom, field-tested habits, and insider tips to help you prepare for your ultra. You'll find guidance on exactly what you need to know to prepare for ultramarathon, including: best gear for ultrarunning fueling and hydration guidelines choosing an ultra trail-running technique first-aid advice beating altitude, storms, and heat race-day game plans crew and pacer tips mental strategies to get you to the finish line The guide offers three detailed training plans to prepare for 50K, 50-mile to 100K, and 100-mile ultramarathons. Start your ultra with confidence and finish it strong with Hal Koerner's *Field Guide to Ultrarunning*!

couch to 50k training plan: *The Tao of Running* Gary Dudley, 2016-07-27 Running is more than moving one foot in front of the other. Running can evoke spiritualism and mindfulness; it can teach fundamental lessons about goals, self-awareness, and self-improvement; it can be a transformative existential experience. *The Tao of Running* offers a fresh perspective on this mental side of running while entertaining with vivid tales of running adventures. Going well beyond the standard training and racing advice found in most running books, it guides runners to a wider understanding of how running fits into their own aspirations, goals, and life philosophy. *The Tao of*

Running answers questions such as: How does running evoke mindfulness and lead to stress reduction? How does running promote special friendships and new perspectives on life? No other book offers readers these multiple frameworks for understanding their running experiences along with lots of practical advice on getting the most out of running. Readers are guaranteed to gain a greater appreciation for the rewards and possibilities inherent in running and will significantly deepen, enlighten, and enrich their running experience.

couch to 50k training plan: 32 Miles from Fat Ross Bays, 2011-07-25 He sat behind a computer for years while his life flew by. He lost control of his weight, his finances, and nearly his marriage. The days ran together while the pounds accumulated and things deteriorated quickly. What has been called One of Today's Most Controversial Running Stories, Ross Bays is determined to create his own destiny. This dramatic account of fat boy turned ultramarathoner in 90 days will inspire you to challenge your own limits and reach for your dreams. This book is not about Running. Nor is it about living a healthy lifestyle. It is about understanding that we are only limited by our own misconceptions about what should be not what could be. There is no should.

couch to 50k training plan: From Couch to 100 Miles Joan Smith, 2025-03-13 From Couch to 100 Miles: A Beginner's Roadmap to Ultra Running Have you ever dreamed of running an ultramarathon but didn't know where to start? From Couch to 100 Miles is the ultimate guide for beginners looking to conquer the seemingly impossible. Whether you're a casual runner or a complete novice, this book provides a step-by-step roadmap to help you build endurance, train smart, and cross the finish line of your first ultra. Inside, you'll discover: □ How to transition from beginner to ultra runner with a structured training plan □ Proven strategies to prevent injuries, recover effectively, and stay strong □ The best gear, nutrition, and hydration tips for peak performance □ Mental toughness techniques to push through self-doubt and fatigue □ Race day strategies to handle pacing, aid stations, and unexpected challenges □ How to stay motivated, find community support, and embrace the ultra lifestyle Written for real people with real lives, this book breaks down the science and strategy behind ultra running into easy-to-follow steps. Whether your goal is 50K, 100K, or the legendary 100-mile race, this guide will help you get there-one step at a time. Your ultra journey starts now. Are you ready to take the first step?

couch to 50k training plan: C25k Matthew Lee, 2013-10 Couch to 5k is a proven running program that has converted thousands of couch potatoes into runners in just a matter of weeks. The program eases you into running, beginning with a combination of running and walking that gets progressively more challenging. You'll run just three times a week for nine weeks. At the end of the program you'll be able to run for 5 Km -- about 3 miles or 30 minutes. This book gives you everything you need to become a runner. It includes the nine-week schedule with detailed explanations of each week's runs. It also includes background information on the program and its philosophy. Most importantly, it answers common questions about the program including how to modify it and how to stay motivated.

couch to 50k training plan: 5k Training for Beginners Jago Holmes, 2013 If you've ever fancied running a 5k or just getting fit enough to run 5 kilometers in one go (that's 3.1 miles to you and me!) and you want to do it in the shortest amount of time, without risking injury, boredom or stagnation, then this book is exactly the one for you. '5k Training For Beginners - From Couch to 5k Runner In 8 Weeks Or Less,' contains everything you need to know about running a 5k in the fastest, most efficient and fun way. The book comes in 2 parts so if you're in to reading all about why and how your body changes then start by reading part 1. Part 2 deals with the physical side of running and jogging and features 4 fantastic simple to follow running programs for beginners of all shapes, sizes and fitness levels. You'll have access to some of the most up to date, cutting edge techniques to help improve your running. THE PROGRAMS AND TECHNIQUES IN THIS BOOK WORK, plain and simple. They've been honed and refined over 12 years having been road tested by a myriad of clients from all types of backgrounds and fitness levels. You won't be bored following this unique, time saving 5k training program AND you won't need to start running endless miles each week in order to see results. If you could get the same benefits by doing a shorter more enjoyable and invigorating run

as opposed to a long, arduous and grueling one, which one would you choose? Hopefully you chose the first option, because this is what the whole concept behind '5k Training for Beginners' is all about. Here are 4 reasons why you should choose this running book... You'll be able to successfully and comfortably run a 5k at the end of your training; you'll have accomplished something that most people only think about doing. This program will help you lose weight quickly, build muscle and tone your body. By committing to something like this, the chances are as a side effect, you'll get in to the best shape of your life! You'll radically improve your health. Keep up with your training and you'll have more energy, be thinner, happier and live longer, you'll just feel great most of the time. Supercharge your energy levels on demand. You'll know exactly how to create your own 'feel good factor' which you can turn on and off like a tap. This program has been designed for beginners and that's the way it's intended, but if you're an experienced runner you'll learn a few things to help you to get better, faster and reduce the amount of time you need to spend running and jogging. No grueling or tedious long distance running needed AND no special equipment required. Here are some more of the secrets you'll learn inside: How the biggest mistake that most new runners make is to set off at the beginning of their run, like a dog out of the traps... way too fast. Meaning within a short distance they need to stop because they're too tired and breathless to carry on. This is one of the worst ways of getting better at running because you'll need to rest after only a short amount of time. You'll discover how using advanced running techniques throughout your 5k training will transform your fitness and stamina levels... in just days never mind weeks. As well as this, these great strategies will actually reduce the overall time you need to spend on your training! It's designed for anyone who wants to start running but hasn't got hours to spare each week to do so. This truly is THE only running book you'll ever need.

couch to 50k training plan: Couch to 5K Your Ultimate Step by Step Running Plan J. Todd Jennings, 2024-08-01 The Couch to 5K program is designed specifically for those who are stepping into the world of running for the first time, making it an ideal choice for beginner runners. This program takes an approachable, gradual method to help you build your endurance and confidence. Starting from a sedentary lifestyle, Couch to 5K offers a structured plan that allows you to transition smoothly into running. By following a carefully crafted schedule, you will find yourself progressing from walking to running 5 kilometers in just nine weeks, transforming not only your fitness level but also your mindset about what you can achieve.

couch to 50k training plan: Running Your First Ultra Krissy Moehl, 2015-12-01 Take Your Training to New Heights with This One-Stop Manual on Ultras With fifteen years running and competing around the world under her belt, Krissy Moehl is a top female ultramarathon runner, respected by her peers and an inspiration to runners everywhere. Between Moehl's positive and encouraging attitude and her deep knowledge and enthusiasm for the sport, there's no one better to prepare and train you for your first ultra and beyond! Moehl will become your guide to completing a 50K, 50-mile or 100-mile race. Her experience translates into the most effective and easy-to-follow training method, broken down into phases to help all runners take it to the next level and accomplish their goals. She shares her love of the sport by providing helpful tips, bonus content and personal stories. Her commitment to growing the sport and passion for coaching others running their first is evident in the care she's taken to create detailed plans and lifestyle adjustments. With Moehl, you will find all the resources and encouragement you need to succeed in challenging your mind and body with an ultramarathon!

couch to 50k training plan: Running Sampson Sharpe, 2014-08-27 Who Else Wants To Run A 5k Race? ***LIMITED TIME OFFER 50% OFF (Regular Price \$5.99)*** Learn how to get back into shape in 12 weeks Do you want to run a 5K race but think you just can't do it? Well, think again. You can do it With this book you can learn how to run a 5K in only twelve short weeks. It may seem like a long time, but it'll fly by when you start to actually train. This book will even teach you how to avoid injury and soreness. You'll even learn how to avoid frustration while training when using this book, and getting someone to train with you is, of course, always a help. Don't forget to plug in your headphones for a little motivation music Week by week you'll find what to do from Sunday to

Saturday. You'll have a plan for each day of the week, while still having a day off. Through the recommended tips you'll find this process to be even easy. So take the plunge, and learn how to run a 5K in as little as 12 weeks. The only thing holding you back is you. Your key is inside this book, waiting for you to grab it and open the doorway to success. 7 Reasons to Buy This Book 1.This book will teach you how to get back into shape with a few simple techniques and tips. 2.Learn how to avoid injury in this book by using the proper relaxation techniques, stretches, and footwear. 3.Inside this book you'll learn how much a buddy can help you when it comes to running and the motivation to do so. 4.You'll learn how to feel comfortable enough to go from training in your home to training in the gym in no time with this book. 5.Inside this book you'll learn how to start your endurance training and build up your stamina for a 5K race in twelve weeks. 6.Learn how to use your diet to your advantage in giving you fuel for your workouts and keeping in you in shape inside this book. 7.This book will teach you how to go from the couch to a 5K safely in twelve weeks. What You'll Learn from Running Yes. Off The Couch & Into The Mud helps you grow your confidence, self-awareness, and new found strength of body and mind. Don't wait! Read this book and unleash your inner badass today! Scroll to the top of the page and select the buy now button.

couch to 50k training plan: Couch to 10k Matthew C. Lee, 2013-10 From the best-selling author of C25K: The Couch to 5K Beginner Running Program, this newly expanded version of the program is designed to turn the average couch potato into a 10K runner in just 14 weeks. Like the original C25K program, this 10K running plan eases you into running. It begins with a combination of running and walking that gets progressively more challenging. You'll run just three times a week for 14 weeks. At the end of the program you'll be able to run for 10 kilometers, or about 6 miles.
