fred jones black history: *The Reverend Jennie Johnson and African Canadian History, 1868-1967* Nina Reid-Maroney, 2013 This first scholarly treatment of a fascinating and understudied figure offers a unique and powerful view of nearly one hundred years of the struggle for freedom in North America. After her conversion at a Baptist revival at sixteen, Jennie Johnson followed the call to preach. Raised in an African Canadian abolitionist community in Ontario, she immigrated to the United States to attend the African Methodist Episcopal Seminary at Wilberforce University. On an October evening in 1909 she stood before a group of Free Will Baptist preachers in the small town of Goblesville, Michigan, and was received into ordained ministry. She was the first ordained woman to serve in Canada and spent her life building churches and working for racial justice on both sides of the national border. In this first extended study of Jennie Johnson's fascinating life, Nina Reid-Maroney reconstructs Johnson's nearly one-hundred-year story -- from her upbringing in a

black abolitionist settlement in nineteenth-century Canada to her work as an activist and Christian minister in the modern civil rights movement. This critical biography of a figure who outstripped the racial and religious barriers of her time offers a unique and powerful view of the struggle for freedom in North America. Nina Reid-Maroney is Associate Professor in the Department of History at Huron University College at Western (London, Ontario) and a coeditor of *The Promised Land: History and Historiography of Black Experience in Chatham-Kent's Settlements*

fred jones black history: The Rural Midwest Since World War II J. L. Anderson, 2014-02-01 J.L. Anderson seeks to change the belief that the Midwest lacks the kind of geographic coherence, historical issues, and cultural touchstones that have informed regional identity in the American South, West, and Northeast. The goal of this illuminating volume is to demonstrate uniqueness in a region that has always been amorphous and is increasingly so. Midwesterners are a dynamic people who shaped the physical and social landscapes of the great midsection of the nation, and they are presented as such in this volume that offers a general yet informed overview of the region after World War II. The contributors—most of whom are Midwesterners by birth or residence—seek to better understand a particular piece of rural America, a place too often caricatured, misunderstood, and ignored. However, the rural landscape has experienced agricultural diversity and major shifts in land use. Farmers in the region have successfully raised new commodities from dairy and cherries to mint and sugar beets. The region has also been a place where community leaders fought to improve their economic and social well-being, women redefined their roles on the farm, and minorities asserted their own version of the American Dream. The rural Midwest is a regional melting pot, and contributors to this volume do not set out to sing its praises or, by contrast, assume the position of Midwestern modesty and self-deprecation. The essays herein rewrite the narrative of rural decline and crisis, and show through solid research and impeccable scholarship that rural Midwesterners have confronted and created challenges uniquely their own.

fred jones black history: Astronomical Pulses to History's Phases Michael A. Susko, 2025-09-26 Bringing together seven volumes of research, Michael A. Susko presents a grand synthesis of astronomical, biological, and cultural evolution. Using a logarithmic model, he shows how the universe has unfolded in accelerating pulses — from galaxies and planets to the rise of life and symbolic humanity. This rhythm of time is then extended through the Neolithic tells and into recorded history, where generational phases reveal cultures growing and transforming in their own natural cycles. Three distinct measures of time — logarithmic pulses, triadic generational units, and fifteen-year historical generations — converge to reveal a patterned fabric of change. Across billions of years and into the present moment, the author demonstrates how time is not a smooth line but a structured unfolding, marked by phases of complexity, consciousness, and cultural renewal. The result is both a sweeping map of our past and a reflection on the nature of time itself — its rhythms, its surprises, and its promise of transformations yet to come.

fred jones black history: Encyclopedia of the Underground Railroad J. Blaine Hudson, 2015-01-09 Fugitive slaves were reported in the American colonies as early as the 1640s, and escapes escalated with the growth of slavery over the next 200 years. As the number of fugitives rose, the Southern states pressed for harsher legislation to prevent escapes. The Fugitive Slave Act of 1850 criminalized any assistance, active or passive, to a runaway slave--yet it only encouraged the behavior it sought to prevent. Friends of the fugitive, whose previous assistance to runaways had been somewhat haphazard, increased their efforts at organization. By the onset of the Civil War in 1861, the Underground Railroad included members, defined stops, set escape routes and a code language. From the abolitionist movement to the Zionville Baptist Missionary Church, this encyclopedia focuses on the people, ideas, events and places associated with the interrelated histories of fugitive slaves, the African American struggle for equality and the American antislavery movement. Information is drawn from primary sources such as public records, document collections, slave autobiographies and antebellum newspapers.

It features election returns for African American presidential, senatorial, congressional, and gubernatorial candidates over time. Rich, insightful narrative explains the data and traces the history of the laws dealing with the enfranchisement and disenfranchisement of African Americans. Topics covered include: - The contributions of statistical pioneers including Monroe Work, W.E.B. DuBois and Ralph Bunche - African American organizations, like the NAACP and National Equal Rights League (NERL) - Pioneering African American officeholders, including the few before the Civil War - Four influxes of African American voters: Reconstruction (Southern African American men), the Fifteenth Amendment (African American men across the country), the Nineteenth Amendment (African American female voters in 1920 election), and the Voting Rights Act of 1965 - The historical development of disenfranchisement in the South and the statistical impact of the tools of

disenfranchisement: literacy clauses, poll taxes, and grandfather clauses. The African-American Electorate features more than 300 tables, 150 figures, and 50 maps, many of which have been created exclusively for this work using demographic, voter registration, election return, and racial precinct data that have never been collected and assembled for the public. An appendix includes popular and electoral voting data for African-American presidential, congressional, and gubernatorial candidates, and a comprehensive bibliography indicates major topic areas and eras concerning the African-American electorate.
