The assessment integrates multiple data points—from psychometric tests to structured interviews and simulations—to provide a 360-degree view of a candidate's leadership promise. This multi-dimensional approach ensures that organizations don't just select leaders based on what they've done but on what they are capable of accomplishing.

Korn Ferry's model evaluates leadership potential through several critical dimensions, including:

- **Learning Agility:** The ability to learn quickly from experience and apply that knowledge in new situations.
- **Drive and Ambition:** Motivation to take on challenges and pursue leadership roles actively.

resisting the imperative to rise at all costs leaves many with an inferiority complex. This bracing take on a classic subject provides new insight into the way psychology aligns with the requirements of effective and happy leadership. The result is to empower us to understand ourselves and step up if we have what it takes to lead—or find equally rewarding, often superior, ways to achieve fulfillment if we don't.

korn ferry assessment of leadership potential: *The 5 Disciplines of Inclusive Organizations* Andrés T. Tapia, Fayruz Kirtzman, 2023-05-23 A comprehensive new model for creating inclusive organizations, illuminating the vital role that inclusion plays in developing solutions to the critical social, environmental, and leadership challenges we face. Most organizational DE&I efforts are focused on changing individual behaviors. But unless you change the organizational structures-the practices, processes, and systems that surround and support individual behaviors-your change efforts will not take root. Structural inclusion makes behavioral inclusion stick. Andrs Tapia and Fayruz Kirtzman have found that five disciplines encompass the structures, mindsets, behaviors, and accountabilities required for creating inclusive organizations that will have transformational impact not only on their culture and people but also on society and the planet: 1: Manage the Risk: know how to deal with the legal, reputational, and cultural risks of either doing the wrong thing, or not doing the right thing. 2: Explode the Awareness: make sure leaders and employees are deeply informed about, and publicly committed to, the value of DE&I. 3: Maximize the Talent Systems: ensure that leaders and managers display inclusive behaviors when they manage and optimize talent. 4: Master the Logistics: integrate DE&I into operations in ways that lead to improved efficiencies. 5: See the Marketplace: expand to new consumer market segments, enhance cross culturally competent customer service, and form effective partnerships with overlooked communities. The authors provide assessment tools and case studies of organizations that have implemented each discipline, highlighting what worked and what tripped them up. And they take a wider view, showing how inclusive organizations practicing the five disciplines can address what they call society's four vital tasks: diversify leadership, eradicate polarization, achieve justice, and save the planet. This is a complete guide to how to make your organization a systematic, process-oriented engineer of change for the full range of your stakeholders.

The practices are not linear but interlaced, and when woven together, they create a complex tapestry of leadership behaviors. In examining the seven practices, the author answers questions such as: • Why do some public service employees love their work and remain engaged while others disengage and do the minimum? • What does it take for love, belonging, and community to dispel fear, disengagement, and isolation? • What sustains those who are engaged and motivated to serve the public? Other topics include what leaders can do to help those who are floundering flourish, ways to promote a culture of respect, and the differences between managers and leaders. Although traditional leadership models have not kept pace with the demands of the workplace, individuals who are pillars of exemplary public service leadership can guide their public service peers to successful leadership.

With 20-plus chapters written by more than 30 contributors, the ATD Talent Management Handbook challenges you to think about the talent model of the future through the lens of different workforce models. It offers progressive thoughts on the current state of talent management and on how the function needs to adapt. Leaders, practitioners, and consultants alike will find useful insights and answers to relevant talent management challenges. Edited by learning and development authority Terry Bickham, this handbook covers the entire talent management cycle, from talent acquisition and engagement to leadership development and succession planning. ATD's first handbook on talent management, this book includes a foreword by ATD President and CEO Tony Bingham, highlighting the foundational components of talent development and its role within talent management.
