The test itself is designed to assess both your theoretical knowledge and practical understanding of the material covered in the chapter.

What Topics Does Chapter 26 Usually Cover?

While the exact content may vary slightly by edition, Chapter 26 often covers topics like:

- Chemical texture services – including perms and relaxers
- Hair structure and composition related to chemical treatments
- Safety precautions for chemical services

Knowing these topics well will help you tackle the test questions confidently.

Key Concepts to Focus on for the Chapter 26 Test

Because Milady's curriculum is comprehensive, the Chapter 26 test will likely include a mix of multiple-choice questions, true/false statements, and possibly short answer or practical components. Here are some essential concepts you should master:

Chemical Texture Services

Understanding how various chemical treatments alter hair structure is fundamental. This includes:

- How perms break and reform disulfide bonds in hair
- The differences between alkaline and acid waves
- How relaxers smooth and straighten hair by breaking bonds

Make sure you can explain the processes and know when to use each type of service.

Hair Analysis and Client Consultation

One of the most important skills in cosmetology is the ability to analyze hair type, porosity, and elasticity before any chemical service. The test may ask you to identify different hair characteristics and determine which treatments are appropriate.

Safety and Sanitation

Chemical services involve strong products that can damage hair or irritate the scalp if not used correctly. Knowing safety protocols, such as patch testing and proper product application, is critical both for passing the test and for real-world practice.
