It is presented in a much more colourful and graphic format than is usual for books on these two subjects. This integration reflects the tendency to teach these two subjects together as “behavioural science”, with an increased stress on the place of medicine in society, and on illness as a product of psychological and social circumstances rather than merely a biological phenomenon. The book reflects these trends and has been successful and popular with students. An integrated treatment of psychology and sociology for medical students - in line with the trend towards teaching these subjects as “behavioural sciences”. Use of case studies and Stop/Think boxes encourages critical thinking and discussion.
