Kingdom economics, as taught by Joshua Selman, is an interpretation of financial and economic principles grounded in the teachings of Jesus Christ and the Bible. It focuses on the concept that the economy of God's kingdom operates on different principles than worldly economic systems. Joshua Selman presents kingdom economics as a divine framework where faith, obedience, and spiritual laws govern the flow and management of resources. This approach encourages believers to view wealth not merely as material accumulation but as a tool for fulfilling God's purpose on earth. The understanding extends beyond personal prosperity to include the welfare of the community and the advancement of the gospel. Joshua Selman emphasizes that kingdom economics requires a mindset shift from scarcity to abundance, recognizing God as the ultimate provider and source of all blessings.

Core Principles of Kingdom Economics

The teachings of kingdom economics by Joshua Selman rest on several fundamental principles that guide believers in their financial lives.
